Toledo, Ohio, January 1st, 1934. Toledo, Ohio, January 1st, 1934.

Wr. Daniel T. Welfe.

Chief of Felice.

Dear Sir:the walfare hungh of heartfully submit a resume of activities of the uniform branch of the invision of rollee during the year of 1933, together with suggestions for the betterment of the service for the ensuing year. The uniform branch of this division has functioned efficiently and the record of crimes and arrests will bear out this statement. A reduction of approximately 22% in the robberies, burglaries, and auto thefts, in 1933 ever 1932 clearly indicates that the uniformed officers are on the alert. Uniformed officers, whether on auto scout duty on on foot patrol, are the best means of prevention of crime, and we have endeavored to cover all sections of the city with a view of reducing the number of crimes, and we feel that much has been accomplished. During the past year, we have been called upon to

furnish large numbers of officers for parades, conventions, foot-ball games, boxing exhibitions, etc., and we have covered them without any serious trouble. However, we are continually being asked to furnish men for private dances, parties, etc., and the officers are detailed to cover such affairs, but with instructions to remain on the streets, watching the autos, etc., instead of keep the men on the streets and in this manner we have been able to vacancies which existed in our ranks.

SHOTOME THE TORING

high standard, and, while we did have violations of the rules, results were had.

care of thru our Detective Bureau with the sid of experts on the Detroit Police Dept., and, when considering the financial straits arrangements, would endeavor to continue the arrangements for the coming year.

of grades as receiving in examinations conducted by the civil service Commission. However, there is one item that we believe should be given consideration, and that is that before any patrol-to the position of Lieutemant, the officer seeking the promotion should demonstrate very decisively that he is able to handle the is gained in this position and that more initiative is required in this position than any other in the Division of Police.

Police officer and 4 regular patrolmen to intersections where large number of school children cross streets. Tould recommend that 4 regular patrolmen and thus releasing these 4 patrolmen for actual that we are showing partiality toward certain corners by placing regular patrolmen there for school duty.

Dear Sinia Chief of Police. Mr. Daniel T. Wolfe,

ere murious grands or our realization

Division of Police to increase the days off from 48 to 52 a year for all police officers and this reduced our working force about 4.4 men per day, which, together with the 20 vacancies, made it a difficult matter at times to give all sections of the city the protection we formerly did. The addition of 4 Civilian School Police would offset this handicap schewhat.

CONTO LO COMMUNICATA MENORS OF ECCUPATION

This samuel let, 1904.

distributed around the building, but in January, 1933, we stored all amountion and extra firearms in a room in the basement of this building, and behind two looked doors and barred windows. This armoment has been placed in charge of Sargaant Lyman Dear, who also makes weekly inspection of all armament at the various stations and in our motor equipment, and makes the necessary repairs or adjustments. Sargaant Dear, being an expert in the handling of fire arms and the repair of same had kept our equipment in very good condition. Sargaant Dear has also instructed ment in very good condition. Sergeant Dear has also instructed all new officers in the art of handling of fire arms, and, we believe, that there will be no fault found with any of his work.

The Rad o Scout Crews are the backbone of the service. te have made many improvements during the past year, and, with the 25 new autos furnished this division during the past year, the crimes have been considerably decreased by virtue of this service. This method of policing makes it possible to cover all places of business in all parts of the city, and has prevented crimes.

This improved Radio Scout Crew service is becoming a very much desired assignment for the more active and conscientious officers and with the officers in this mood, the service will continue to improve, which is our desire.

Our Patrol Wagon Service is not confined to actual police work, but we handle sick and injured as well as some lunatics. It appears that the charity work during the depression has greatly increased and, Dr. Dreyer, City Physician, keeps one of our patrol wagons in his service about 8 hours each day in hauling sick and injured to and from hospitals and his office. We did reduce this work somewhat by having all the regular patients meet at County Hospital wo. 2, provided these catiants are able, and then drive them to our Hospital No. 1 for treatment.

Motorcycle Service during the past year has been handled by 10 to 15 officers and have done all class of service, and did endeavor to reduce "Speeding" and "seckless Driving", and to make the streets safer for the general public.

We have made several shifts in our motor assignments, but the most important was the adding of a scout car to the day shift, and also assigning a scout car to the "Downtown" district, the last named covering three shifts, and thus allowing us to spread our foot patrolmen over a larger area. This last named detail was inaugurated for the express purpose of cutting down the number of auto thefts, thefts of parts off of parked autos, and the theft of articles out of parked autos, as well as to give the downtown merchants better service. The report for December, 1933, shows a decided decrease in such crimes.

now keep an enter this new arrengement would not cost much more end it would increase the efficiency of the soline work and would prevent original and the appeals, on the day shift, would be in lamatranders with the denot sundered

The state of the s

Division of Police of Lagrange and Lagrange and Counsell sadder and Proceeding and Counsell sadder and Cou

Some of our patrol wagons will undoubtedly be worn to such a point in about a year that it will be inadvisable to continue them in service, and would recommend that, in place of replacing them with a patrol wagon, they be replaced with a light auto, with a coach body, but to have this body of a type that can open at the side or rear and arranged on the incide to take core of a stratcher-case. Then, in place of having this car stationed at some sub-station, it would be placed in radio scout duty, covering a certain district, and being available for all class of service.

at present when a call is sent that there is an accident at some point and it is not known if anyone is injured, we send a scout crew and a patrol wagen so that emergencies will be taken care of properly. With this new type of auto, one the scout car would be sent as it could handle any kind of a case.

However, before finally adopting the system, would like to give it a thorough trial and would suggest that the East Side of the river be covered in this manner. We have one scout crew in service on the East Side at all times and one patrol wagon in service at all times. With the arggested arrangement, there would be two scout crews on duty and, instead of covering the entire East Side, we would divide the district making the dividing line as Main St., from the river to Starr Ave., and then on Starr Ave. to the City limits, and, this arrangement would give that side of the river virtually twice the radio service that it is now receiving and without any additional cost to the city. Should this prove the success that we feel it will, we would then divide the balance of the city in a similar way, and, instead of having 10 districts in the city, we would have the city divided into 15 districts, and, as stated above, without any additional cost or mon. With the city divided into 15 districts and with this type of equipment, any place in the city could be reached by our scout crews in such a short time that they would in reality be "MINUTE MEN", and this is the kind of service that would be appreciated by our citizens. It possible that the will

You will note that in order to accomplish this placing of 15 crews on duty at one time will not mean any increase in the personnel, but it will mean the transfer of the men on fatrol wagon buty, namely 7 at each station, which are No. 2, 4, 5, 6, and 7, stations, from fatrol wagon duty to madio secut duty. However, it will meen that we can close up the sub-stations, thus eliminating the cost of upksep, painting, fuel, light, and supplies necessary to the operation of a sub-station. A new patrol such as we now have in use, would cost from \$1500.00 to \$1500.00, while a scout car would cost about \$500.00. Of course, the scout car in actual service will make about 5 times as much mileage and will use about 5 times as much gas and oil and will probably wear out in a shorter time, but, when all the facts are considered, we believe that the suggested plan would cause no more expense than the present system, and the increased efficiency of the service would be the result.

One addition we would like to put into effect at once is to place another radio crew in service on the East Side with hours from 8.00 P.H. to 4.00 A.M., using two men now assigned to the East Side on foot patrol. In emergencies, the captin could also use this radio car on the day shift and if he deemed it advisable, he could use one of the day patrolmen as a driver. As the captain now uses an auto, this new arrangement would not cost much more and it would increase the efficiency of the police work and would prevent crimes, and the captain, on the day shift, would be in constant touch with hesdquarters.

at a selary of \$130.00 per month. This jenifor should be a handy non, who be make winer repairs, one jobs of varnishing and raint-ing, algebraing of nume, etc., and to evereso the work of all of the junitors. Sinc, this Chief Julior should week until Acoust 0.00 P.H., should open windows, etc.

One of the special details furnished during the past years is the assigning of a uniformed patrolmen to the City Treasurer's of ice. Cherry at. Bridge, covering 24 hours a day, making it necessary for us to use about 56 men each day, thus depriving the streets of their service.

a point in store a year before mesons att mesons to ment to one to energy and the sound to energy and the sound to energy and the sound to be sound to

Ind published alequeer service in this bailding is

while we want to do all we can in the interest of the city, we believe that some arrangement, such as a burglar alarm, could be installed on the safe and connected up with the "High Pressure Station, below them, and in that manner we could give the officers street duty covering a district.

Also, Commencing about Dec. 20th of each year and continuing to about Jan. 5th, the sale of Ohio State auto licenses is made from various points in the city, and it is necessary for us to cover these places for as high as 16 hours each day, and this takes patrolmentoff the streets. As this is an Ohio State proposition and the city receives a major portion of the license fees, we would suggest that these tags be sold from our various sub-stations by the appointed deputies, and in this manner the deputies would be protected by our men who are assigned to the stations and the money could be transferred to the bank by our officers. This arrangement would not cost the state anything and there would be no additional expense to the city in the way of light or heat and it would release officers for active police duty on the streets.

Pully realizing that the city is not in position to purchase new equipment, we equipped 4 of the older motorcycles with side cars for use this winter and we are keeping the better cycles for use next summer when the work will be more strenuous. Would also recommend that the oldest motorcycles, about 8 in number, be sold at the carliest possible time so that they will not depreciate further in value. These 8 motorcycles are unfit for use in the Division of Police.

Bldg. Garage who do all the servicing of motor equipment, make minor repairs, and wash autos, and one receives 65¢ per hour and the other 60¢ per hour. We also have a white man working at the Radio sepair Station washing the radio scout cars and this man receives 70¢ per hour and is carried on the sign shop payroll. Would recommend that these three positions be classied as "Garage Attendants" and that they receive \$125.00 per month. Their service has been of a high-grade quality and has been satisfactory.

The cleanliness and sanitation of the Safety Bldg., during the past few months, has been whewhat neglected because of lack of supplies. Buring the first few years that we were in the Safety Bldg., the linoleum on the floors were well waxed and polished and presented a nice appearance. The walls of the corridors and offices were painted each year. The janitors, having the required supplies, kept the building very clean. Due to the lack of supplies, this work has not been done during the past year. The janitors have done about all that could be expected of them when considering the lack of supplies.

hour doing the odd jobs around the Safety Bldg., and we would like to change this job to a titled position of "Chief Janitor" at a salary of \$130.00 per month. This janitor should be a handy man, able to make minor repairs, odd jobs of varnishing and painting, tightening of nuts, etc., and to oversee the work of all of the janitors. Also, this Chief Janitor should work until about 6,00 P.N., checking open windows, etc.

ofthe we conserve that send arremmentally much on a be while at want to do all so out in the interest of the making in percentry for he has about the new made day, there Processors of Lad, Grang of, Brings, apporting 24 bears a day, Young in the analyzing of a uniformed parrolium to the city one of the appoint details furnished during the past The passenger elevator service in this building is being handled by two men classified as laborers at 60¢ per hour. Would recommend that two persons be employed with a rating of "Elevator Operator" at a salary of \$100.00 per month. We have 4 men on our payroll classified as "Elevator operators" @ \$125.00 per month. These men are building engineers and millwrights, taking care of all machinery, much of which is complicated and delivate, such as the cooling system, heating system, dynamos, elevators, etc. They also make plumbing repairs, repair windows, frames, doors, locks, air compressors, vacuum pumps, and the 24 motors used at this building. Each of these men have proven themselves as officient, and we would recommend that their elassification be changed to "Engineers", salary of \$150.00 per month, except one who should be classified as "Chief Engineer" at a rate of \$180.00 per month. The Police Sub-Stations, namely No. 2, 4, 5, 6, and 7, should have the floors and walls painted and also the large doors and window frames. This work has not been done for several years due to lack of supplies. The Police Traffic Sign Shop is located at old No. 3 Sub-Station, located on Lagrange St., near Buron St., and this is an old building and it costs considerable to heat. The Radio Repair Station is located at old No. 3 Fire Station, Jefferson and Ontario, and this is a very old building and requires considerable fuel to heat the place. Also, do not believe that this building is a safe place to store our autos, especially when considering that our autos are not insured. We understand that the city is contemplating the building of a storehouse or something similar on So. Superior St., and, if this is a fact, would like to have some arrangements made whereby our hadic Repair Shop, including the storing of our autos, and out Sign Shop included in this program. In that way, we could dispose of the present site of the sign shop and the radio repair station. We believe that both of these buildings do not warrant being repaired. One other item that would be of material help to the Division of Pelice would be a regulation of places selling beer and whiskey, especially in regard to hours of denoting, music, and closing time. If this could be made a state or federal regulation, it would serve the purpose much better. aent you to know that I have thoroughly enjoyed my work under your supervision and assure you that I will endeavor to continue to merit the confidence you placed in me, and wishing you a continued successful administration, I am, esed of through the poster is all is that our hare to Respectfully, and as Rh Aller s sentens and backs Inspector of Police. January 5, 1934

Daniel T. Wolfe chief of Police

The following is a report of the activities of my office during the year 1935;

The list below shows the number of uniforms purchased together with the total cost of same, the amount paid, and the balance due The Fechheimer Brothers Company and The Imerson Cap Company:

31 pr. of serge brocedes & \$7.35 pr. - \$227.85 & 1 pr. whippord \$3.20 pr. - \$32.00 & 5 pr. trousers \$4.75 pr. - \$227.85 & 1 pr. whippord \$3.20 pr. - \$32.00 & 5 pr. trousers \$4.75 pr. - \$20.25 & 5 hort costs \$1.55.25 ea. - \$4.575 & 5 summer suits \$22.00 ea. - \$115.00 & 5 shirts \$8.25 ea. - \$25.50 & 5 shirts \$8.25 e

The total purchase for the year as shown on my books amounts to the small sum of \$1340.20. Compared with the sum expanded by members of the Department for uniform during the year 1932, which was \$5096.50, shows a serious loss. This state of affairs shows an alarming decline in the uniforms purchased by the men of the Department. This decline of course is reflected in the general appearance of the men. This condition of affairs is due to the drastic cut in salary coupled with the fact that the city was months delinquent in payment of salaries. Added to this difficulty was the issuing of the illegal acrip that could only be dis-

was the issuing of the illegal scrip that could only be disposed of through the payment of water bills. The result of it all is that our heretofore proved record of being one of the best ground uniform forces in the country has received a serious set back.

A city is judged by the type, standard of intelligence, and personal appearance of its uniformed police officers. It is therefore most important that the personal appearance be kept at a high standard. Although we have passed through days and years of depression and sacrifices had to be made. I opine that during the last two years the members of the police department have suffered a greater financial loss than their very important place in civic government warranted. Society could not survive a few short hours without laws and officers to enforce them. This fact was clearly demonstrated when the police of Boston went on strike for a decent living

wage. No sooner had they withdrawn their surveillance over society than the staid old city of Boston was plundered and left to the mercy of its ruthless, destroying, and lawless mob. It was necessary to send in troops to restore an order and tranquility, at the point of the bayonet, that was maintained by the clubless police of Boston.

subjects bought and a large mulear of sen perced the presenting

Having established the importance of the police it is natural to suggest that they be fully remunerated for their service. If their present day salaries are to be maintained I recommend an allowance of \$50.00 a year be granted for the purchase of uniforms and leather equipment. This is only asking for what is equitable. Blade & Frinting Company, The Chiowsinhigun Paper Company, The

## Control-Oble Peper (RANGE) The 5. F. Made & Company, The Frankin

and The Telede Deterandice Company. During the past year a much needed improvement was made on the Toledo Police Revolver Range at Bay View Park. The improvement consisted of the construction of a running target. The one previously used was but a makeshift. The one that I installed is complete in every detail. As in the past it was necessary to solicit the material used in its construction from friends of the Department. The material used consisted of ties, narrow gauge tracks, carriage on which the target is set, cement, crushed stone, also lumber for the construction of the carriage house and roofing paper to cover same. very important job of policing that the instructions becomeny must be imported before and not after appointment to the position

of vatroless. ARMS INSTRUCTIONS appliessin for the post-tion of patroless, ARMS INSTRUCTIONS appliessin for the post-tion, be given a six-walles composed testining to highe scool One of the most important assets of a police officer is the mastery of fire-arms. This can be attained only by frequent practice. To be able to draw quick and fire accurately is in itself an art. While the Department can boast of a number of excellent marksmen their training has been on the regulation target. This training does not suffice for the reason that an officer in actual conflict cannot employ any of the methods used in that training. The running and surprise targets should be used extensively in the training of men in the art of marksmanship. We have the running target and I hope to be privileged to install surprise targets on our range. If this is done I recommend that ammunition be purchased in quantitles sufficient to assure to each man of the Department a thorough training in the handling of fire-arms. to the position and greater security to the citizens of Teleco for the reason that he would be physically and moutally equip-

## POLICE SCHOOL

In the past year there has been inaugurated, within the Department, a police school. The instructions given consisted of writing, spelling, criminal law, and evidence. The instructions in spelling end writing were imparted by Professor Jaeger, and Sergeant Russell of this Department. The criminal law and evidence were imparted through a series of lectures by Hoporable Judge Aaron Cohn. There were also lectures on civic government given by Mr. H. T. Shenefield, former secretary of the Publicity and Afficiency Commission of this city. The class-room was the gymnasium in the Safety Building and the classes were conducted so as to accommodate the various reliefs - that is, three classes for a period of an hour each, once a week for a period of 32 weeks. The attendance was approximately 280 men. At the end of the school term an examination was held on the various

rage. No sooner had they withdrawn their surveillance over society than the staid old olty of Boston was plundered and society than the staid old olty of Boston was plundered and society to the march of its rechies, destroying, and impless left so the march to send in troops to restore an order

subjects taught and a large number of men passed the prescribed percentage and were given diplomas in all the subjects. Special diplomas were awarded to 27 persons for excellency in business writing. Samples of their writing were passed on by the faculty of the Eanerian College, conducted by The Eaner-Bloser company, at Columbus, This college is acknowledged as the fore-most institution of its kind in the United States and one can feel justly proud when awarded a diploma by that authority. In order to institute the school it was necessary for me to go to public spirited citizens of Toledo to solicit tables, chairs, writing-paper, ink, pens, blotters and all of the other equipment used. The firms who contributed are: The Home Furniture Company, The Hixon-Feterson Lumber Company, The B. J. Spicker Company, The Cumingham Lumber Company, The South-Side Lumber Company, The Leather-Textile Company, The McManus-Troup Company, The Toledo Blade & Frinting Company, The McManus-Troup Company, The Toledo Blade & Frinting Company, The McManus-Troup Company, The Franklin Printing & Engraving Company, and The Toledo Merchandise Company. The materials and supplies donated by these firms amounted to several hundreds of dollars.

while the first police school was a splendid success its continuation will depend on the cooperation of the city government. The supply of paper and other material necessary for its continuance is exhausted and I am loathe to continue begging these necessary supplies. While this school was of benefit, to the men who attended, it is in ne way complete. I am of the belief that in order to secure the best men possible for this very important job of policing that the instructions necessary must be imparted before and not after appointment to the position of patrolmen. I sgain recommend that applicants for the position of patrolmen, after passing the necessary medical examination, be given a six-months course of thaining in night school at The Toledo University, the cost of same to be borne by the city of Toledo. The instructions should comeist of writing, spelling, composition, English, criminal-law and precedure, evidence, civic government, and sociology. This is not an extensive course. The police school at Northwestern University has 52 courses. After the six months course the examination should be held by the faculty of the University and the nemes of the successful students be certified to The Civil Service Commission. If this method of securing men for the Department were employed then honest, capable, and intelligent men would be secured. It would do away with the play-boy for no young man would undertake to go through the course unless he was carmestly secking the position. The fact that he would be the possessor of a diploma issued by the University would add dignity to the position and greater security to the citizens of Toledo for the reason that he would be physically and mentally equipped to discharge intelligently his very important duties. Some months ago I visited President Hash of The Toledo University to discuss this proposition. I found in Mash favorably inclined to the plan. During the course of our conversation has maintained that the american Public is demanding more security from the hood lum

BUREAU OF SCEINTIFIC RESEARCH

Another long felt want in this Department is a bureau of

Onbinet.

subjects taught and a large number of men passed the prescribed percentage and were given diplomes in all the subjects. Special diplomas ware awarded to 27 persons for excellency in tanine awarding. Samples of their writing were messed on by the faculty of the langual tollege, commeted by The samer-less compared to the following ware into the faculty at Columbus, the fact of the fact of

sceintific research. The establishment of such a bureau could be made possible through the cooperation of the chemist experts of the Toledo University. The ballistic end of the bureau could be handled by Fatrolman Venia who has given extensive thought and study to this subject. The only thing to fully qualify him for this work is a visit to the Colt and Smith & Tesson Plants. Each of these concerns have volunteered to aid a representative of this Department in the ballistic study. The time spent in the two factories would not exceed one month and the cost less than \$100.00. It is indeed humiliating to this Department to be compelled to send fatal bullets, in homicide cases, to the ballistic expert of the Detroit Police Department to determine whether or not they were fired from a particular gun when we have a man so well qualified as Patrolman Venia to a tart this bureau. I repeat my recommendation of last year and true that steps necessary be taken to establish such a bureau in our Department.

## CRIME THE WASHINGTON

During the past decade of years a crime wave that has been sweeping over this country has reached its crest. The future will determine whether it is receding or gaining in volume. So threatening has been this onslaught on law and order become that it seems the very stability of society is threatened. A super government of monsters have battled constituted authority and the law enforcing agencies have failed to cope against this devastating force. So threatening has it become that the President of the United States desires a Mational Police Bureau styled "An American Scotland Yard".

Some years ago I was privileged to head an escort for General Summerall, then Chief of Staff of the United States Army, from the Pennsylvania Depot in Toledo to Camp Perry, Ohio. While enroute the crime problem was discussed. I opined that one of the stumbling blocks, to law enforcement, was the ease with which criminals were able to evade punishment for the crimes by removing themselves from the authority of the courts having jurisdiction of their offenses. I maintain that somer or later the people of the United States will empower their law-makers to establish, by legislation, a National Police Bureau. General Summerall commented that government control of the criminal would go a long way towards the elimination of crime. He is giving serious thought to the question. If such a bureau is organized it will prove the solution of the orime problem in this country. It will break down the barriers of "State Rights" in so far as they relate to requisition on extradition of criminals who have fled to neighboring states after the commission of heinous crimes. The system under which we now work to bring back criminals to the courts having jurisdiction of the crime charged, is both costly and time consuming. In all Pederal offenses such as counterfeiting, The Mann Act, Harrison Drug Act, Interstate Shipments, etc., a Federal Officer brings back without delay or question, the criminal to the juris-diction of the court that the Government elects to judge the offense. The Federal Court, without question, deals with the culprit in an expeditious manner. All other felonies could be thus handled if through proper legislation they were compiled into Federal Statutes. Let us hope that the day is not far distant when there will be a Secretary of Police in the President's Cabinet.

Months

ampleone fauthe out a farge major of the peaks

During the past year my office handled successfully the sale of tickets for the benefit of the widows and orphans of former members of this Department- said benefit being a concert given by The Toledo Civic Symphony Orchestra in the Civic Auditorium which metted about \$1600.00 to the pension fund.

adelinative resourch. The establishment of such a burest dould be nade between it, the people of the Polede University, the people of the character expensity, the ballichie ent of the character expensity could be manufact by labrature which are because and enterest

This office also handled the News Bee-Police Benefit Fight held in the Civic Auditorium the night of December 18th. The net proceeds amounted to about \$2200.00 which was used to purchase food for the needy. Some 700 baskets being delivered by The Tiedtke Brothers Company to destitute homes on Christmas

Wishing you continued success in the administration of your office.

Yours respectfully.

Toledo, Onio, Jamary lat, 1934 Mr. Daniel T. Wolfe, Chief of Palice. Dear Siring Payons of the stable Below is shown the monthly and total cost of meals and liquor arrests during the year 19 served to prisoners during the year 1933: I have, under your supervision, directed the activities of the officers assigned to the appoint squad known as the vice, gambling and liquor January, and\$267.53n so ansigned have worked faithfully. Up to Nevember, we had 10 men, but at present we have 8 men. We be February vorec184.07 ppress commercialised vice inco far as the public is effected, and more particularly the objectional features such as soliciting by women for the purpose of prostitution, or gambling openly Marchah a mar 208.60 to attract the attention of the general public. Many gambling devices were picked up as shown on the attached statements. At the present time, we know of no gambling devices on display Aprilia city 167.65 Marijuana or "Loco Weed" has been sold in Tolede for the past several yeMay. There 1184.50 ederal law covering this, but out state law covers the sale of this "Loco Weed", and we have prosesuated quite a number and we also have destroyed several bushel of the mixed product, June we belie 167.88 t very little traffic in this "Cigarette" is now in vogus. Lique July: violati 221.33 a been mumerous and we have made many arrests, as shown on attached statement, but we have not obtained a majority of convictions due to the rulings of our Municipal Judges who stated taugust seems 218.03; insufficient evidence, and that we would have to secure a "Buy", but, as no money was available for such expenses, we were handleapped. September 204.98 Since the advent of 3.2 beer, members of these squads have investigated the records and characters of the applicants for licenses, and we harOctobered in 176.08 armony with the Ohio Liquor Control Commission, and, on numerous occasions, officials of the commission have expressed themselves as highly pleased with our efforts.

November 190.63 We have received bundreds of complaints regarding the noise coming from the places selling beer, and this was especially true during the war December whe 160.63 ens were being operated or the windows and doors of the stores being open. We contrasted the operators of these places, explained to them what the complaints were, and they all agreed ToTALes \$ 2,351.91 mate the cause for complaints. Magy complaints were also registered that mapy drunken persons were coming from these places where beer was sold and that liquor was being sold also, and, although we investigated many such complaints, we discovered only two places where such violation was being made, and both of these places were reported to the Chio Liquor Control Commission for disposition. If the Police Department is to regulate the places where liquor is being sold, we believe that certain regulations should be inaugurated, such as closing time, Sunday hours, hours when music and entertainment are to be allowed, kind of entertainment, tax and licenses macessary. We believe that, so far as consistent, the laws should be state or federal, as should this city pass an ordinance making the closing time at midnight, and the county might have no closing time, the city operator would less the aftermidnight business which would go to the operator outside out the city sho would be taxed

Mr. Daniel T. Wolfe, Chief of Police. h less than the city operator. Also, the geographical position of Toledo might cause some loss of wads to Michigan, thus Dear Sir: the revenue of the state. We are attaching hereto reports showing vice, gambling and liquor arrests during the year 1933. to continue, it will be the state of the same and the entire year If it could be I have, under your supervision, directed the activities of the officers assigned to the special squad known as the vice, gambling and liquor squads, and the men so assigned have worked faithfully. Up to November, we had 10 men, but at present we have 8 men. of a different color each year with the year, nems! We have endeavored to suppress commercialized vice inso far as the public is effected, and more particularly the objectional features such as soliciting by women for the purpose of prostitution, or gambling openly in such a manner as to attract the attention of the general public. Many gambling devices were picked up as shown on the attached statements. At the present time, we know of no gambling devices on display in this city. being commisted and could be reached by headquarters on very short notice. At present, these men phone in once each hour Marijuana or "Loco Weed" has been sold in Toledo for the past several years. There is no federal law covering this, but out state law covers the sale of this "Loco Weed", and we have prosecuted quite a number and we also have destroyed several bushel of the mixed product, and, we believe, that very little traffic in this "Cigarette" is now in vogue. your kindly guidance and advise during the past year Liquor law violations have been numerous and we have

the menthly and total cost of meals

Liquor law violations have been numerous and we have made many arrests, as shown on attached statement, but we have not obtained a majority of convictions due to the rulings of our Municipal Judges who stated that "Possession" was insufficient evidence, and that we would have to secure a "Buy", but, as no money was available for such expenses, we were handicapped.

Since the advent of 3.2 beer, members of these squads have investigated the records and characters of the applicants for licenses, and we have worked in close harmony with the Ohio Liquor Control Commission, and, on numerous occasions, officials of the commission have expressed themselves as highly pleased with our efforts.

We have received hundreds of complaints regarding the noise coming from the places selling beer, and this was especially true during the warm weather when "Gardens" were being operated or the windows and doors of the stores being open. We contacted the operators of these places, explained to them what the complaints were, and they all agreed to endeavor to eliminate the cause for complaints.

Mapy complaints were also registered that mapy drunken persons were coming from these places where beer was sold and that liquor was being sold also, and, although we investigated many such complaints, we discovered only two places where such violation was being made, and both of these places were reported to the Ohio Liquor Control Commission for disposition.

If the Police Department is to regulate the places where liquor is being sold, we believe that certain regulations should be inaugurated, such as closing time, Sunday hours, hours when music and entertainment are to be allowed, kind of entertainment, tax and licenses necessary. We believe that, so far as consistent, the laws should be state or federal, as should this city pass an ordinance making the closing time at midnight, and the county might have no closing time, the city operator would lose the aftermidnight business which would go to the operator outside oof the city who would be taxed

Chief of Police. Mr. Daniel T. Wolfe, 图 and licensed much less than the city operator. Also, the geographical position of Toledo might cause some loss of trade to Michigan, thus reducing the revenue of the state. Under the present laws of Ohio, beer licenses expire one year from date of issue. If this is to continue, it will mean that licenses will have to be checked during the entire year. Also, if it could be arranged, believe that all licenses should expire at the year as it would enable various officials to accurately estimate the derived. We also helieve that licenses should be the revenue to be derived. We also believe that licenses should be of a different color each year with the year, namely "1934" in bold type. This would make checking much easier and would eliminate chance for alterations on the licenses. Would suggest that the auto used by the members of the special squad be equipped with a radio so that the crews working from 10:00 A.M. to 6:00 P.M., and from 6:00 P.M. to 2:00 A.M., would be in constant touch with the crimes being committed and could be reached by headquarters on very short notice. At present, these men phone in We wish to assure you that we have endeavored to merit your confidence in our work and sincerely trust that our efforts have met with your approval. 新 和 to 经 都 Co 数 的 Thanking you for your kindly guidance and advice during the past year and hoping that you will have a successful and prosperous administration during the ensuing year, we are, Respectfully, 10 10 0 0 0 6 0 8 8 В 100 о о о и и и и д и о в о и и и

Abandoning Freguent Women Sergeant Margaret Mater. by Policemomen Margaret Brogen, Ella Langendorf, Mary Toung and The following arrests were made and carried through Court The Women's Bureau of the Toleto Police Department was Organized in 1921 and has been especially successful in handling cases involving women and children, where their sex has opened avenues of approach which are normally closed to men. The Women's Bureau is directly under the Chief of Police and actual street patrol by women police has been found to provide a better perspective of the problem by furnishing practical examples upon which effective technique must hinge, and notes, D. C. in an effort to wante First, investigating and interviewing delinquents and prethru the courts or unofficially. Successful unofficial action or prevention work requires skill. Many a young person apparently well started in a career of delinquency has recovered as though by magic after a policewoman has adjusted the individual without court action. Letters of inquiry from various parts of the World are and untiring work of the policewomen. The Bureau consists of a woman Police

delinquents, adult females, adolescent females and young boys and girls, then deciding whether a case is to be disposed of officially

investigated by policewomen and reports made thereon. Many a person has been placed in touch with long lost relatives through the patient

The Policewomen enforce the street trade ordinance, dance hall ordinance, and ordinance controlling phrenology and fortune telling. With beer and liquor being made legal this Year the dance halls have increased in number from 72 to 232; these are all supervised by police-With your cooperation and help we hope to make the Women's women.

Policewomen are assigned to patrol the railroad stations and bus stations, doing preventive and protective work among young girls and women coming into Toledo. They meet the incoming and out-going trains on the look out for runaway girls and boys. Stranded persons are helped on their way or referred to the proper social agency.

The Policewomen work in connection with the City Physician assisting him by investigating all cases reported as mental cases.

Policewomen assist Police Officers in securing evidence regarding the movements of criminals and suspected persons, and in interviewing girls and women witnesses in cases in which intimate sex relations are involved. They assist the morality squad in obtaining evidence in cases of prostitution in hotels and rooming houses, and investigate suspicious advertisements for employment appearing in the daily papers. They are called upon by the Better Business Bureau to make investigations and secure evidence in swindling games. Government officials use Policewomen to help them secure evidence in Mann Act cases, as well as in Narcotic and other offenses against federal laws. The Policewomen are often called upon to assist the liquor and gambling squads in making cases.

Policewomen do protective work among girls and women who have been overcharged, or employment misrepresented to them by employment agencies. They also search for juvenile escapes from training and industrial schools, as well as for violators of paroles, and children wanted by the Juvenile Court. They handle complaints having to do with fake doctors, midwives, obscene literature and pictures, and fakers of every sort and description.

Organized in 1921 and has been aspectally successful in bandling cases involving women and children where the The Women's Bureau of the Toledo Police Department was

The Toledo Police Department looks upon its Policewomen's Bureau as upon any Police Division, where the head must know and be able to act in the numerous cases that are referred to it each

Policewomen are working with the United States Department of Justice by taking finger prints of all females arrested on vice charges; these are sent into Washington, D.C. in an effort to stamp out White Slave Traffic.

The Policewomen are kind and courteous, but firm in the performance of duty and capable of meeting and disposing of any emergency that may arise in the days work. Their duties are numerous, arduous and varied, and to perform them successfully has required time, patience and training. The Bureau as now organized and operating, is a real credit to the department and community at large. The women are well versed in Police duty and work hard to bring to justice all law violators, and are especially interested in offenses committed against

At the present time the Women's Bureau consists of a woman Police Sergeant in charge, who is responsible for housing and feeding of all women prisoners; equipment and cleaning; records of arrest, and the governing of three cell block Matrons, three Desk Matrons, three Police-

With your cooperation and help we hope to make the Women's Bureau the most valuable preventive agency in the community.

A STATE OF THE PARTY. Respectfully,

We also have four (4) Willys Six Patrol Wagons in Sub-Stations; one (1) at number four Sub-Station, one (1) at number five Sub-Station, one (1) at number six Sub-Station and one (1) at number seven Sub-Station. These Patrol Wagons are in fairly good shape and should give us at lease two (2) more years of service without much trouble. There are two (2) Ford one-ton trucks used by the Police Sign Shop, a branch of the Police Traffic Bureau. These two (2) trucks are in fairly good condition. At this time we have thirteen (13) Ford V-8's Conches, and one (1) Chevrolet Six Coach which we are useing in Radio No Ford Service. These cars are practically new and only have about an hord fourteen (14) thousand miles on them and should give us at lease two (2) years of Service. There are sleven (11) Thewrolat Six coaches being used by the Detective Department, on districts and as flyers. These Chevrolets used by the Detective Department have only about six (6) thousand miles on them, and should be good for about two (2) years of service.
There is two (2) Gedillae seven passengers sedans and one buick eight five passengers sed n and of these one Cadillac is used by the Director of Public Safety, the other one by the Mayor, and the Buick sedan by the Chief of Police. These cars are in good condition and should be good for two (2) years of service. We have one Cadillac touring and one sedan that is not in very good condition. The touring car is held in at the Radio Repair Shop for an extra and the sedan is at the Safety Building, used by the Detectives for emergency cases. Rnights, Sterns Enight, Rupmobile, model A Fords, Chevrolets, Mash, Whippets, sixes and fours; all of which were confiscated and purchased by the Police Dept. These cars run from 1926 up to 1930 models, and are used by Inspectors, Captains, Ser-geants, Booze, Vice and Gambling Squad, Women's Bureau and Safety Div. Detectives. Thirty-four of these sixty-five automobiles are equiped and dillocavith radios. The Bhapa A Rte. 0 486.89 Respectfully, L. L. Matthews SERGEANT OF MOTOR EQUIPMENT.

the Toledo Police Depertment of the Automobile Division of we have at this time sixty-five (65) automobiles which also have chirty-one (51) motorofeles of which class (16) in condition for service. Break the sixty-five (65) automobiles which also have chirty-one (51) motorofeles of which there is

Daniel T. Wolfe, hier of Police. January 10th, 1934. I herewith submit to you a full and complete report of the activities of the Traffic Bureau for the year of 1933 and a comparison with the records for the year of 1932. The first and most important record to be considered is the accident record. The record for the year of 1933 shows a decrease in the total accidents and a slight increase in the fetal and can be attributed to the decreasing number of automobiles on the atreets daily in this as well as other cities, and also to the abows the accidents increased in the last month by month comparison people to purchase automobiles and to operate them over our as automobiles on the accidents increased and to operate them over our as automobiles on the streets. The in the last months, as employment streets. It is an actional projects, permitting as automobiles on the accident and to operate them over our as a successive to purchase automobiles and to operate them over our as a successive to purchase automobiles and to operate them over our as a successive to a successive them the peak hours of traffic.

FOR THE There was a total of 5012 accidents reported to the Traffic Sureau during the year of 1933, as compared to a total of 6503

There was a total of ools accidents reported to the Traffic Sureau during the year of 1933, as compared to a total of 6503 reported during the YEAR OF 19933 which represents a decrease of 7 percent in the total number of accidents reported. There were 4925 non-injury accidents during the year of 1933 as compared to accidents during 1932. There were 1603 injury accidents during 1932. There were 1603 injury accidents during 1932. There were 1603 injury accidents during 1932. There were 55 fatal accidents which resulted in injuries to 1941 persons, resulted in the death of 58 persons in 1933 as compared to 52 resulted in the death of 58 persons in 1933 as compared to 52 resulted in the death of 58 persons in 1933 as compared to 52 accidents over those of 1932 as well as an increase of 4 percent in the number of persons injured. The fatal accidents show an increase over 1932 of 5 percent and the number of persons killed of the decrease of 7 percent in the spite above.

An analysis of where the accidents are happening gives us the following information. There was, of a total of 6012 accidents, 380% accidents at intersections and 2209 in between the blocks, on bridges, private parkways and elsewhere. There 3014 during the night season. This record shows, as it has every year since this department has been making an analysis of at intersections during the day light hours. This can be attributed, partly, to the small number of metoroxyele officers that are available for patrol duty in the outlying sections of pedestrians as well, being more careless and negligent in their benefit of the police protection such as we are able to offer eaty. The more congested and closely built up sections of the

Toledo, Ohio, January 10th, 1934.

r. Daniel T. Wolfe, hief of Police.

Sir: s were 5239 accidence happened during clear weather and the

I herewith submit to you a full and complete report of the activities of the Traffic Bureau for the year of 1933 and a comparison with the records for the year of 1932. 16 years of age

n making an analysis of the weather conditions we find that

The first and most important record to be considered is the accident record. The record for the year of 1933 shows a decrease in the total accidents and a slight increase in the fatal and injury classifications. The decrease in the total classification can be attributed to the decreasing number of automobiles on the streets daily in this as well as other cities, and also to the unemployment situation. However, a month by month comparison shows the accidents increasing in the last months, as employment increased with the various governmental projects, permitting people to purchase automobiles and to operate them over our streets. "ith unemployment there are fewer pedestrians as well as automobiles on the streets, particularly in the morning and evening hours, which are considered the peak hours of traffic.

There was a total of 6012 accidents reported to the Traffic Bureau during the year of 1933, as compared to a total of 6503 reported during the year of 1932, which represents a decrease of 7 percent in the total number of accidents reported. There were 4354 non-injury accidents during the year of 1933 as compared to 4925 non-injury accidents during 1932. There were 1603 injury accidents during 1933 which resulted in injuries to 1941 persons, as compared to 1526 injury accidents and 1864 persons injured during the year of 1932. There were 55 fatal accidents which resulted in the death of 58 persons in 1933 as compared to 52 fatal accidents resulting in the death of 55 persons during the year of 1932. There was an increase of 5 percent in the injury accidents over those of 1932 as well as an increase of 4 percent in the number of persons injured. The fatal accidents show an increase over 1932 of 5 percent and the number of persons killed in 1933 also show an increase of 5 percent over those killed during the year of 1932. All of these increases were in spite of the decrease of 7 percent in the total accidents as shown

An analysis of where the accidents are happening gives us the following information. There was, of a total of 6012 accidents, 3803 accidents at intersections and 2209 in between the blocks, on bridges, private parkways and elsewhere. There were 3998 accidents recorded as happening in the day time and 2014 during the night season. This record shows, as it has every year since this department has been making an analysis of the accident reports, that the majority of the accidents happen at intersections during the day light hours. This can be attributed, partly, to the small number of motorcycle officers that are available for patrol duty in the outlying sections of the city. This naturally results in the motorists, and the pedestrians as well, being more careless and negligent in their actions in these districts where they cannot receive the full benefit of the police protection such as we are able to offer them in the more congested and closely built up sections of the department has been keeping records of accidents. hours are the same for all classes of traffic, by actual count.

alone in Toledo, but in all the major cities of

January loth, 1954.

2.

In making an analysis of the weather conditions we find that there were 5209 accidents happened during clear weather and the remaining 803 accidents while it was raining, snowing, foggy or misty.

The analysis of the ages of the killed and injuredaduring the year of 1933 shows that there were 12 male children, 16 years of age and under, killed and 372 injured; there were 33 male adults, 16 years of age and over, killed and 940 injured; there were 10 female adults, 16 years of age and over, killed and 456 injured; and there were 3 female children, 16 years of age and under, killed and 173 injured, which represents a total of 58 persons killed and 1941 injured. The record shows of course, a greater number of adult persons killed and injured. However, the total number of children killed (15) and injured (545) is quite high and represents an increase over 1932.

An analysis of the vehicles involved in accidents as set forth in the next table and a comparison with the same analysis for the year of 1932 shows that there were the following classes of collisions together with the increase or decrease in each classification.

property damages. The services every one CLASS these cases.	TOTAL 1933	TOTAL 1932	PERCENTA INCREASE	GES DECREASE
Auto vs Pedestrian. Auto vs Auto. Auto vs Motorcycle. Auto vs Team. Auto vs Bicycle. Auto vs Trolley. Auto vs Miscellaneous.	1082 4565 8 16 17 184 140	1181 4964 7 2 15 160 174	are recorded shows that the 14 NU700R OF AC 13 NMTS 15	20
Running across TOTAL	-6012	6503	AVERAGE-	7

An analysis of the hours of the day during which accidents happened during the year of 1933, is set forth in the table below and furnishes the following information.

TIME OF DAY	TOTAL N	ON-INJURY	INJURY	FATAL
12:01 to 6:00 A 6:01 to 9:00 A.M. 9:01 to 12:00 Noon. 12:01 to 3:00 P.M. 3:01 to 6:00 P.M. 6:01 to 9:00 P.M. 9:01 to 12:00 Midnight.	566 471 662 902 1759 951 701	380 354 471 664 1276 684 525	177 115 188 232 469 256 166	9 2 3 6 14 11 10
GRAND TOTALS-	6012 <sub>TAL</sub>	4354	1603	55 87

Note: There has been no comparison made with the figures for 1932 55 because of a change of records as of July 1st 1933.

However, the analysis of the hours during which accidents happened in 1933, set forth in the table above, shows that the majority of the accidents happened between the hours of 3:00 P.M. and 6:00 P.M. The peak hour is between 5:00 and 6:00 P.M. This analysis has never been change; since this department has been keeping records of accidents. These hours are the same for all classes of traffic, by actual count, anot alone in Toledo, but in all the major cities of the United States.

In making an analysis of the weather conditions we find that remaining 803 accidents happened during clear weather and the The analysis of the ages of the killed and injuredaduring the and under, killed and 572 injured; there were 12 male children, 16 years of age and over, killed and 940 injured; there were 35 male adults, 16 years female children, 16 years of age and over, killed and 456 injured; there were 10 female adults which represents a total of 58 persons killed and 175 injured, injured, However, the total number of adult person The injured (545), the total number of adult person The injured injured the total number of adult person The injured (545), the total number of adult person The injured injured (545), the total number of adult person The injured (545), the total number of adult person The injured (545), the total number of adult person The injured (545), the total number of adult person The injured (545), the total number of adult person The injured (545), the total number of adult person The injured (545), the injured injured the injured injure

S°

r. Deniel T. Wolfe,

January loch, 1954.

There were five (5) cases in which the County Coroner returned ordicts of manslaughter arising out of accidents in which one or more persons were involved fatally, or referred them to the Lucas County frand Jury for consideration. Following is a list of these cases, the late of the accident and the disposition in each case in so far as we have been able to complete the record at this time.

It is quite difficult in the great majority of cases of fatals to secure enough information to get an indictment and conviction for manshaughter, since it must be shown beyond a reasonable doubt that there was a violation of a State Law which resulted in the death of some person involved in the accident. This however, has never operated to prevent interested parties from prosecuting a civil action against the driver or owner of the car, in an effort to collect personal or property damages. The services of the Traffic Bureau are offered to every one involved in an accident and all assistance possible is given to the public in these cases.

An analysis of the 55 fatal accidents which are recorded in the Traffic Bureau that happened in the year of 1933 shows that they can be attributed to the following causes:

A close inspection of the two classes of accidents as outfiled in the preceeding table shows very clearly that in all such ases the accidents could have been avoided had the motorist, and the pedestrian as well. exercised care and caution. It proves onclusively that carelessness, thoughtlessness and recklessness on the part of the driver and nedestrian is either directly or indirectly the cause of every accident reported to the Traffic

In order that a better understanding be given to the motorists and the pedestrians - something that will assist them a great deal in helping to save human life - some means should be devised whereby an educational program could be outlined. In most cities this work is carried on extensively by Automobile Clubs, Safety Councils, and other civic organizations. While it is true that the Toledo Automobile Club and the Toledo Safety Council have given a great deal of time and assistance in this work, nevertheless, I feel that more will have to be done along this line if we are to impress pon the public their duties to each other. This can only be accomplished by constantly keeping before the public the dangers that are confronting them at all times. If it were at all possible for the city to spend money for such purposes, it would be money expended in the finest way possible, but I fully realize that the financial condition of the city will not permit such an expenditure at this time. We must therefore rely solely upon the three newspapers, the Toledo Blade, Morning Times and the News-Ree, which have contributed so generously the space they have allotted in their papers. their papers, and to appeal to all civic organizations to assist in every way possible in placing these educational features before the public. amount collected by the Traffic Bureau during 1933 as

shown above was \$11,873.00, said amount being deposited with the It has been the policy of this department to investigate all accidents in which personal injuries or fatalities were sustained. Out of a total of 1603 injury and 55 fatal accidents, this de partment made investigations in 1060 cases. Of this number, 820 were minor injury cases and no investigation report was necessary for our files. The remaining 240 cases were either serious injury or fatal accidents, and a complete investigation was made and full reports submitted and filed in this office pertaining to each case. During the year of 1933 there were many drivers put in Court through the efforts of this department, for some violation of the traffic ordinance which resulted in an accident. The Court has ruled in such cases, that the party injured or some member of the family must file the affidavit, which ruling of course takes the prosecution of the case out of the hands of the Traffic Bureau. At the present time this Bureau completes these investigations and then submits all the facts in the case to the Prosecutor for his consideration and recommendations. This has enabled this office to be of great service to people involved in accidents and at the same time aid a great deal in completing our records in those cases where we were unable to obtain sufficient information at the time of the accident. The investigation of accidents is a problem that more serious consideration must be given to by the Police Department. In order that the accident reports can be given more study and attention, I wish to recommend that one additional patrolman be detailed to this office for this work. At the present time only one patrolman is detailed to this office for this duty and if an additional man were assigned, a great deal more information could be secured for this important phase of the work.

there were a great many

YEAR OF 1933 - FINES COLLEGIED AMOUNTED TO- - - - - - - 11,873.00 via the Turn TOTAL VIOLATIONS- - - 61704 YEAR OF 1932 - FINES COLLECTED AMOUNTED TO- - - - - \$20,986.00 "No lights - Ter For For For For For School 12075 1207 moved or had fictions TOTAL VIOLATIONS- - - 55990

The total amount collected by the Traffic Bureau during 1933 as shown above was \$11,873.00, said amount being deposited with the Finance Department, daily collections receipted. This was a decrease of approximately 43 percent from the amount collected and deposited for the year of 1932. This can be accounted for when we take into consideration the lower registration figures for 1933 and the fact that so many neople out of employment, though unable to pay fines, can still find enough money to purchase license plates, - together with the fact that this department was unable to get service in so many cases where the persons had failed to appear in answer to a summons for a parking. violation. Also the ease with which a defendant is able to get discharged when the case goes to Court, makes the collection of fines very erratic. In Court, it is necessary for the arresting officer to testify that he saw the defendant park his car, before he can gain a conviction. Such testimony can rarely, if ever, be given by an officer, for it is very seldom an officer sees any particular car parked and fix the identity of the person in his mind for future reference; and cases

Ordinance #9590 passed on April 3rd 1933 provided that any person operating a vehicle in violation of Section-35 and Section-36, and for all parking violations, should have the option of paying a fine in the Traffic Bureau, in lieu of going to Court, of the following amounts:

such an assignment be made and 1.00 for each offense, except double parking which shall be \$2.00

This set up of fines has since been reaffirmed in the new Traffic Ordinance #9867 passed on December 18th 1933. This also accounts for some of the decrease in the amount of money collected by the Bureau during 1933. Prior to April 3rd 1933, this office was permitted by Ordinance #4034 to charge fees ranging from 1.00 for the first offense to \$5.00 for the fourth and subsequent offenses, which did of course, operate to help swell the total receipts for the years priocr to 1933.

It is evident that the number of violations in which the 963.00 record cannot be finally disposed of has increased, and there 355.00 was also an increase in the number of violations for the year of 1933 as compared to 1932. This department has experienced in 1933 as in previous years, considerable difficulty in securing service on warrants that are issued against persons charged with a violation of the parking ordinances. In 1933 it was necessary to take out 2863, affidavits charging meonle with violations. Of this number, 7987 cases were unable to be disposed of because the people in taking out their license plates had given ficticious names and addresses or had moved and were unable to be located. 27159 cases were ordered in to Traffic Court for final disposition, or fined, together with 1089 cases directly disposed of in Court via the arrest blotter, all of which still left a total of 16836 cases undisposed of on December 31st, 1933. The remaining cases have however, been carried over into this year and every effort will be made to get them settled. Another reason why this number of cases was not disposed of, is because this office has had at no time a sufficient number of men assigned to the work of serving affidavits. I have repeatedly in the past few years requested that such an assignment be made and at this time, I wish to again make an appeal to you that this assignment be made, and that these officers so assigned be detailed to no other duty. In a number of our major cities the Police Departments have a normal an assignment of our major cities the Police Departments have a regular assignment known as the "Warrant Squad" that looks after this duty, along with the regular serving of warrants. It would be a fine thing if our department could have the services of a similar squad of men.

7.

In commenting on the number of violations which this department is been unable to dispose of, I wish to again call your attention to the following. Each year the Police Department is experiencing new ifficulties in trying to get service on these violators. The owner of the car will go to a registration office and will give a ficticious name and address, with the result that this department is unable to get service in these cases. The violtor may have as many as twenty-five violations recorded against him in this office. This is shown only too well when the figures compiled by this Bureau show that approximately twenty-five (25) percent of all violations fall within this category,—that is, either they have given ficticious information, or have moved since obtaining their license, and no trace of them can be found. In order that we may be able, better, to cope with this situation, I wish to recommend that an ordinance be passed giving the police devartment the right to tow any car off the street, where there are three (3) or note violations recorded against the license number. I am positive that if Council will pass an ordinance of this kind, worded so that it will include a provision for charges on towing and storage, that there would not be so many repeatedly flagrant violations by the same people, always agnoring the traffic ordinance.

Following is a table showing the number of one, two, three and five dollar fines assessed by the Traffic Bureau during the year of 1933 and a comparison with the records for the year of 1932, setting forth the amounts collected in each class.

In commenting on the number of violations which this department following. Each year the Police Department all your attention to car will go to a registration office and will give a fieticious of the result that this department is experiencing new riolations recorded against him in this department is unable to wenty-five (25) percent of all violations as twenty-five since obtaining they have given ficticious fines obtaining their license, and no trace of them can be found or since obtaining that an ordinance be passed giving the can be found. In the right to tow any car off the passed giving the police department in wish or your attention, it wish to tow any car off the street, where the police department is not all with the situation.

I am submitting to you at this time a report of the activities

of the Police Preffic Sign Shop during the year of 1933 and a com-In commenting on the arrests for major offenses as recorded aring the year of 1933, there was a decrease of 86 in the number of crests as compared to 1932, therebieng a total of 2197 arrests during hat year for major offenses. In connection with this record, I believe would be advisable during 1934 to assign as many men as possible to actorcycle duty for street patrol. Just the very presence of these men on the streets has proven to be a great factor in keeping down the reckless driver and the persistent violator. At the present time there are only eight (8) motorcycle officers on active duty, which is much less than for many years previous. If the motorcycle squad could be increased to at least fifteen (15) men, with an additional two (2) men to be assigned to serving warrants and traffic affidavits, I am quite certain this department would be able to show a decided improvement in the records for this year of 1934. This would also be the means of increasing the revenue from traffic fines, besides doing much to prevent arry of the accidents caused by some infraction of traffic ordinances.

The following tables give the increase or decrease in motor vehicle registration in Lucas County over a period of five (5) years, together the comparison showing the increase and decrease in traffic accidents for a like period of time, giving the number of persons killed and rejured:

# TABLE #1

OTOR VEHICLE REGISTRATION, LUCAS COUNTY, 1929 to and including 1933.

TOTAL YEAR REGISTRATION	PERCENT PASSENGER PERC NT INC. DEC. CARS. INC. DEC	PC's.& PERCENT TRUCK INC. DEC.

1.933 80000	7 72000 7 817 6	8000 11

Icte: Totals and percentages for 1933 are only approximate. The official figures are never attainable until sometime late in February.

## TABLE #2

TOTAL OPERATIONS - -

work.

TRAFFIC ACCIDENTS & FERSON TOTAL PERCENT TEAR ACCIDENTS INC. DEC.	TOTAL PERCENT	TOTAL P	RCENT
1929 14065 12 1930 10853 22 931 9099 16 .932 6503 28 .933 6012 7	2498 14 2443 15 2440 .001 1864 23 1941 4	69 85 55	22 23 35 5

Note; There has been a gratifying decrease in the totals since 1929.

The National Safety Council in 1933 adopted a new form for the reporting of accidents. This form was the result of considerable study and is modern and complete in every respect. This new form was adopted by this department, and it has provided us with a more complete record of each accident. At the present time this office cannot make a complete comparison of all accident data for the reason that his new form was not adopted until July 1st 1933, but this year we will have this comparison, which will add greatly to the information obtainable an accidents in this office.

In commenting on the arrests for major offenses as recorded rests - compared to 1935, there was a decrease of 86 in the number of net year for major offenses. In connection with this record, I believe would be advisable during 1934 to assign as many men as possible to the stracts has proven to be a great factor in keeping down the record, each the only eight (8) motorcycle officers on active duty, which is much not easigned to at least fifteen (15) men, with an additional two (2) men on this department would be able to show a decided improvement to the short short show a decided improvement to the short sha

A comparison of the record for the year	s been a	sharp dec	Of

A comparison of the record for the year of 1933 with that of 1932 for Sign Shop activities shows a decrease of 320 in the number of operations. There was however, a great deal more painting of streets, curbs, zones and the like during 1933 than during 1932 this to the extent of 4576 square feet. This can be attributed to the increasing number of schools throughout the city that have requested the painting of school zones. This is a very necessary function of the traffic sign show and serious effort should be made to provide this department with a sufficient supply of paint and equipment to carry on with this phase of the work. The painting of these zones, safety lines, stop signs and the like have proven to be a great help in the directing of traffic, most narticularly in the vicinity of schools, and has beloed in a great measure in the prevention of accidents. Particularly in the outlying districts where the motorists have not the benefit of continued police protection and equipment that is afforded them in the more closely built up portions of the city, this feature of traffic work has helped very much in reducing accidents and siding safety educational work.

asked to consider the question of char You will note from the above list of permits and licenses that were issued through this office, that there was an average decrease of 793 in the total number as compared to those issued in 1932. This has occured chiefly in taxicab drivers, soft drink and pool room licenses, together with licenses and permits for amusements in the different classifications. As in previous years there has been a sharp decline in the number of soft drink licenses issued, there being 303 less issued in 1933 than in 1932. With the repeal of the prohibition laws it is naturally to be expected that there will be a decrease in this class.

One of the most difficult problems confronting the police department and one that effects the business of the entire city is the movement of heavy trucks. In dealing with this problem, the entire city must be taken into consideration, for the reason that the motor truck is used more extensively today than ever before in the history of the country. There is no question but what this will continue. In order to meet this condition it would be advisable for the city to establish a definite program in connection with this problem.

Amusement First class.

I wish to submit at this time a list of all licenses and permits the comparison with the same record for the year of 1932,

11.

- 1. Routes should be mapped out that will take care of the interstate shipping passing in and out of the city.
- 2. Direct routes should be laid out to and from all major industrial plants located within the city.
- 3. Routes should be laid out to all freight depots, all warehouses and wholesale houses.
- 4. That secondary routes should be laid out through the residential sections that will permit deliveries to be made to stores and homes. These routes to be used only on accasion, when taking merchandise in or out of these certain districts.

In this way the entire city could receive this service without any great inconvenience to anyone. This problem is of such a serious nature in that effects so many people and so many of the industries, that most mareful study must be given it. I therefor, wish to earnestly recommend that this matter be given early consideration and that it be submitted to Council just as soon as possible.

In connection with this recommendation, I wish to call your attention to the fact that in 1933 there were possibly forty different ordinances passed by Council limiting the loads of trucks to 5, 8 and 10 tons on certain streets. Also with this there was a great deal of wrangling between State, City, Railroad and various indistries in regards to this transportation problem. In considering the load limits on trucks, I feel that the city should adopt the same weight measures as set up in the State Law. While I am certain that it will not be necessary at this time to designate a number of street that heavy trucks will have to be permitted on only occasionally, that possibly the construction of the pavement is not of sufficient strength to really permit it, nevertheless, if we do not want to impede the growth of business we must consider it. This should be considered not only from the legal standpoint but also as to just what effect it will have on business.

I wish also to recommend at this time that the proper officials be asked to consider the question of changing the pavement assessments in the future, - that is, on the streets that are to be designated as heavy duty streets. The reason for this is that many of the streets that should be designated as such, no doubt have a majority of residential property abutting these streets, and it is hardly fair the way these assessments are now made. At the present time the property owners are standing the full amount of the cost of such pavement. It may be necessary for this question to be finally decided either by our City Council or by the State Legislature, but it is a retainly a question that permits of lengthy argument and merits much consideration.

es possible to permit connecting the progressive traffic signal control system, now in operation in the downtown district, to all the streets running both east and west, north and south, as far out as Twenty-first Street.

2. Direct routes should be mapped out that will take care of the interindustrial plants located within the city.

3. Routes should be laid out to all freight depots, all warehouses and wholesale houses.

4. That secondary routes should be laid out through the residential homes. These routes to be used only on accasion, when taking merchandise in or out of these certain districts.

In this way the entire city could receive this service and stream inconvenience to anyone. This problem is problem.

12. Since the year 1928, when Summit Street was repaved, there have been a great many fatal and serious injury accidents along this street between Bush Street and Ash Street. Most of the persons involved in these accidents were pedestrians, and a study made of these reports, leads this department to feel that in a great measure the lighting conditions along Summit Street has been responsible for the accidents. The street lights at the present time are placed one at each intersecting street, particularly between the above mentioned streets, being only one light to each intersection. This makes the visibility at night very poor. Under such conditions, it is very dangerous for pedestrians who at times are compelled to cross Summit Street in this locality. In order to correct this condition I wish at this time to recommend that sufficient additional arc lights be placed to properly illuminate this street. Also I wish to recommend that traffic lights be installed at the intersection of Summit and Stickney Avenue, in the immediate future. This would be in front of the Women's and Children's Hospital, which seems to me the logical location for the lights, as it would serve not only

to permit a break in the traffic. thereby reducing the speed of the traffic, but would also lend added safety to persons going to

The new canel bouleverd which is now under construction will be completed in the very near future and it is my understanding that this highway is to be taken over by the Federal Highway Com-mission. If this is done, it possibly might be that the U.S. Government would take care of the traffic control lights that must be erected along this highway between Detroit Avenue and Erie Street. There are possibly about twelve (12) intersections that must be protected. Of course, if this is not done by the government, it will then be necessary for an appropriation to be made by the City to cover the cost of installing these traffic signals. Just what amount of money would be necessary to cover the cost of this would be, I am not in a position at this time to say. However, I feel that in making up the appropriations for this year, consideration should be given to the project, because these lights are absolutely necessary along this highway.

I know that the financial condition of the city is in a terrible condition and I also fully realize that expenditures of monies must be asked for only the most necessary governmental functions. However, I feel that there are a few intersections, that if there is any way possible. appropriations of funds should be made to cover the cost of installing traffic signal lights. Consideration should be given to allowing for traffic signal light installations at Main and Sixth Streets: Main and Fourth Streets: Islington Street and Detroit Avenue: and Summit Street and Stickney Avenue as mentioned in this report. I would also recommend at this time, that a sufficient amount of money be appropriated as early as possible to permit connecting the progressive traffic signal control system. Now in operation in the downtown district, to all the streets running both east and west. North and south, as far out as Twenty-first Street.

of Summit and Stickney venue, in the immediate future. This would be in front of the Women's and Children's Hospital, which seems to to permit a break in the traffic, thereby reducing the speed. to recommend that traffic lights be installed at the intersection lights be placed to properly illuminate this street. #1so I wish I wish at this time to recommend that sufficient additional arc Summit Street in this locality. In order to correct this condition very dangerous for pedestrians who at times are compelled to cross the visibility at night very poor. Under such conditions, it is at each intersecting street, particularly between the above mentioned streets, being only one light to each intersection. This makes the accidents. The street lights at the present time are placed one the lighting conditions along Summit Street has been responsible for have been a great many fatal and serious injury accidents along this street between Bush Street and Ash Street, Most of the persons involved in these accidents were pedestrians, and a study made of the lighting conditions along Summit Street has been respectful for Since the year 1928, when Summit Street was repeved, there 13. PERSONNEL ACTIVITY REPORTS.

Captains Rydman, Fruchey, and Timiney are assigned as Captains of Detectives, while F. Langhoff, a Detailed Detective, has filled the Acting Captains' assignment. Captain Timiney has had special duties most of the year, acting as head of the Racketeer Squad. All of these men have taken care of their jobs very satisfactorily.

Regular Detective J. O'Reilly is assigned as City and County Detective. His work embodies that of Chief Probation Officer. See Annual Probation Report for detailed information. He is one of the oldest members of the division and this long service makes him invaluable in that respect.

Detailed Detective M. Rowan has had special assignment for the year, acting as head of the Vice, Liquor and Gambling Squads. His long experience in the Detective Division has made him very effecient in that capacity. He has supervised the operations of those squads very effectively.

apprehending a robbery suspect, R. Elliot, whom he was tive J. Mullen, accidently at 14th and Woodruff Sts., While Oct 25 - E. C. Kinsgley, 2124 Warren St, age 25: shot by City Detec-St. Coroners findings as homicidal. Case pending in Grand Stabbed by Robert Ollis, 1239 Edgewood Dr., at 3010 Albion Juny. WEST END AND AUBURNDALE DETAIL.

Regular Detective Hassenzahl, Detailed Detectives Ringle, Mavis and Daly make up the "West End and Auburndale" detail; investigating all offenses except burglaries and robberies in those districts. In view of the fact that their assignments cover a very large part of the city, their work have been satisfactory. Their shifts alternate monthly from 8:00 A. M. to 4:00 P. M. and from 4:00 P. M. to midnight. They have participated in or wholly caused the arrests listed below and the property recovered.

MISSING PERSON DETAIL.

Patrolman Hollinger investigates all complaints of a "Missing Person" nature. The tremendous volume of detail involved in this work clearly shows that he has been very enerjetic in taking care of that kind of complaints. He has investigated 640 male persons, reported missing from Toledo, all being located with the exception of 16. In addition there were 14 male persons located in Toledo who were reported missing from other cities. Any spare time was used endeavoring to locate some of the 295 female persons who were reported missing in Toledo during 1933. He has participated in or wholly caused the arrests listed below.

DESK CREWS our times that a course of this nature will be allered at the pledo Universi Patrolmen Glenn, Papenfus, Ness, Bielefeldt, Meeker and Gonia are assigned to the Detective Desk and helping the Captain of Detectives in his duties. They have splendidly fulfilled these requirments; the duties being such that they practically confine them to inside work all the time.

### Very respectivily, RECOMMENDATIONS

I herewith submit to you my recommendation for the betterment of the Detective Division for the year of 1934. While these suggestions may not appear in order, in view of the economic conditions fof the City of Toledo, the results obtained and the benefits derived will so obviously overpower any small cost which may be necessitated in the installation of these recommendations.

- 1. ONE ADDITIONAL CAPTAIN OF DETECTIVES. The Detective Division is sorely in need of an extra Captain. While there are three regular Captains, one of whom has done special duty for the past year, it has necessitated using an Acting Captain to fill his place. Irregulatities such as sickness, days off, etc., have always interferred to some extent with the regular routine of this rank. This job is exactly the same as a regular Captain, carrying the same duties. The extra Captaincy would only be an increase of \$25.00 per month. Benefits derived from the harmony and authority this Captaincy would make, should materially benefit our division.
- 2. SEVEN REGULAR DETECTIVES. Through several different manners this division has been confronted with the assigning of Regular Detectives to Special Duty. One Regular Detective, J. O'Reilly, has been assigned as special investigator in the County Prosecutors' office; having had that assignment for some twelve years. Other Regular Detectives have had the duties of Acting Captain of Detectives, there being no relief Captain. These, along with numerous other special duties, with which we are always confronted, break up and short-shift our regular crews, greatly handicapping the service. Regular Detectives rank as Lieutenants, their salary being the same amount. So that this division may function harmoniously, with integrity and regularity, it is my suggestion that the City Council be requested to increase the Regular Detectives by seven men, making a total of twenty-five. There are numerous Detailed Detective who deserve promotion.
- 3. THE AUTO SQUAD, PAWN SHOP AND SECOND-HAND STORE RECORDS BE TRANS-FERRED TO THE RECORDS DIVISON. We have in operation for the past year a Records Division, ably supervised by Inspector McKey. It is my suggestion that the records now kept in the Auto Squad, Pawnshop and Second-Hand store offices, of the Detective Division, be transferred to the Records Division so that all police records are maintained in one central place.

this department has had cause to need ballistic readings and analysis, in the assigning of one, two or more of our men to take bullets and other sach analysis, in essential evidence to the Detroit Police Department for such analysis, and I am happy to report that we have slways had the fullets co-operation with sech day we are finding the need of this kind of evidence. There are ballistic analysis, which could be mastered by one of the men in this department; preferably a man with a college education and one who is interested and of the finding the second the men in this department; and of study these subjects.

Plus lellowing autos are equipped with radio receiving sets;

2 Hope Part 1 Chrysler; 5 Whippets, 1 Cadillag; 10 fb, sets;

Twelve new Chevrolets 2ere equipped with radios and placed in service on 7-27-1933.

Scout Car No. 123 (Whippet) was equipped with radio and placed in service 8-30-1933.

Scout Car No. 10 (Dodge, Terminal R.R.Co.) was equipped with radio and placed in service on 8-30-1933.

One Model AR 4160 RCA Victor Radio was received and was tested in all parts of the city and county, with good results. Radio returned to manufacturer 2-14-1933.

One Model K-41 Motorvox Radio was received from the Toledo Motormeter & Guage Co., was tested in all parts of the city and county with good results. Radio returned to manufacturer 2-22-33.

One Sparton No. 41 radio, received from the SparksWorthington Co., was tested in all weak and dead spots in the city
with excellent results. Radio returned to manufacturer 6-5-1933.
One Ford-Majestic radio, received from the Ford Motor
Car Co., was tested in all parts of the city and county, also in
dead spots, with good results. Radio returned to Ford Co. 6-1-33.

Between July 22nd, 1933, and August 21st, 1933, we received thirteen new Ford V'8's and 12 new Chevrolets. These cars are all equipped with Bosch Model X-123 short wave radio receiving sets; "B" eliminators; special generators; heavy duty battery; siren; spot-light; bullet-proof winshield; and seat covers. These are the best police equipment we have ever had. We are badly in need of gun cases for these cars to carry the shot-guns in. At present the guns lay on the cushians in the back seat and the barrel cuts holes in the side of the cushions. I had a sample case made up by the M. I. Wilcox Co., 210 Water St., Toledo, Ohio, of heavy canvas, to hang below the right rear window. Each case will hold a shot-gun, two police clubs, a first aid kit, ammunition, and has a pocket for report sheets. These cases will cost \$2.35 each and about fifteen will be required for all Scout Cars.

Since we junked some of the old scout cars we have eight of the old Model 88 radio receivers, which can be installed in the patrol wagons at a cost of about \$12.00 each(to replace old cables, batteries, install antenna, etc.). These sets will only be in use when they are answering a wagon call, but will enable the wagon to be at the disposal of the dispatcher at all times, especially when making a minor run and the wagon is needed on a major complaint. These sets will only be in use about two and a half hours out of every twenty-four hours, so it will not be necessary to electrify them, as a block of "B" batteries will last at least six months.

We are in need of a good tube checker for the radio service department. At present we purchase tubes from one dealer and then take them to another dealer to have them tested, which is not a good policy.

Respectfully submitted,

Sergeant in Charge.

Chief Probation Officer; Zuche County, Chio. Scout Car No. 10 (Dodge, Terminal R.R.Co.) was equipped with radio and placed in service on 8-50-1935. Table Showing Descent of

Arrested, by Offense:

Probatton officer for the year long population at my activities as ier (Entapet) was controled with redde and placed in Daniel T. Wolfe, Obief of Police, Chief of Police Records Division Subject Annual Report for 1933 Dear Sir: I am handing you herewith the first Annual Report of the Records Division, covering the year 1933. As the Records Division only was organized and started to function October 1st, 1932, no report for that year was available. Tables are furnished for all of the subjects on which a record is kept. The tables are bound in the following order: Table of Known Offenses: This table shows the number of known offenses, the number of clearances, with the percent thereof, as well as a comparison between 1932 and 1933. (Two sheets) Table Showing All Arrests and All Final Dispositions, by Offenses, in Municipal Court: This table includes the disposition of all court cases as well as the final disposition in Municipal Court, including those felony cases which were held to the Grand Jury. Table Showing All Final Dispositions of Felony Cases, Table (two sheets) Showing dispositions of Felony Cases, by Judges. Table Showing in Condensed Form, Final Disposition in Municipal Court, by each Judge, by Sex and Color: This table shows a considerable variation in the number of cases handled by the four judges, as well as the difference shown from a lieniency standpoint. Table Showing Final Dispositions of all Cases Handled by Judge Ira Cole, followed by four tables (three sheets) segregated into sex and color. Table Showing Final Dispositions of all Cases Handled by Judge Leonard Donovan, followed by four tables (three sheets) segregated into sex and color. Table Showing Final Dispositions of All Cases Handled by Judge Frank O'Connell, followed by four tables (three sheets) segregated into sex and color. Table Showing Final Dispositions of All Cases Handled by Judge Homer Ramey, followed by four tables (two sheets) segregated into sex and color. Table Showing in Which Detective District All Offenses Occurred. From the results shown it indicates that the boundries of the several districts could be advantageously changed, as it shows the crews on one district are handling twenty-five percent of the cases. Table of Ages of Persons Arrested, Showing Offense and Sex. Table (two sheets) Showing Descent of All Male Persons Arrested, by Offense. Table Showing Descent of All Female Persons Arrested, by Offense.

Table Showing Occupations of All Persons Arrested, by Offense.

The following order:

In the following order:

Subject Annual Report for 1833

I am handing you herewith the first Annual Report of the only was organized and started to innerior october lat, 1938, no report for that year was available. Tables are furnished for all

Table Showing, in Condensed Form: Citizenship & Employment; Education; and Marital Status. This table is segregated into those committing offenses handled in Municipal Court, those arrested for Suspicion, for Federal Offenses, for Lunacy, and all miscellaneous Non-Court cases. The information contained in these tables is on file in detailed form, by offenses, in the Records Division.

Table Showing the Time of Day or Night all Robberies were Committed, by Months.

Table (two sheets) Showing the Make and Model (style of body) of Automobiles Stolen.

Report (two sheets) from John Louy, Superintendent of the Bureau of Identification & Records, of the Activities in His Department for 1933.

This report may seem rather voluminous in that it covers more territory than any previous annual report. As a matter of fact, one of the reasons that the Records Division was organized was to know the facts contained in these detailed reports.

As you know, under the old system the Chief of Detectives was always in possession of information, for instance, as to the number of robberies committed each month and the number of persons arrested for such offenses; but at no time was any record ever kept collectively, of the districts in which offenses were committed; neither was any record ever kept, collectively, of what became of the arrested persons in-as-far-as convictions were concerned. So much for the report.

I think it advisable to make mention of some unfortunate conditions which have arisen due to the establishment of the Records Division.

As was to be expected, and which developes in any new movement, which has for its objective the systematizing of records with the attendant curtailment of duplication, thereby attaining more efficiency, a certain amount of opposition to the Records Division has developed within the department. This is coming from two sources. The first is engendered by petty jealousy on the part of those subordinates who dislike to see any new movement succeed, which they do not instigate or which they are not a party to. This attitude in a semi-military organization such as a police department is borders very closely to insubordination. To my knowledge this feeling has been communicated to a good many of the Councilmen to the disadvantage of the department as a whole

The second source is from those whose work, from the standpoint of results attained, is not up to the standard expected from them. For years no record has been kept of the number of offenses given to each individual or crew to investigate, neither has any record whatever been kept of those cases they failed to solve, i.e.: clear by arrest or otherwise. The only record and the only reports made were of those offenses which were cleared.

One of the main objectives of the Records Division is to keep track of all known offenses and to know the final outcome on each individual case. To do this, a report is expected on all cases within seventy-two hours, whether anything has been accomplished or not, and if such case is not cleared a further report is expected each seventh day thereafter until such case is cleared or marked "Closed".

Table Showing the Time of Day or Night all Robberies Were these tables is on file in detailed form, by offenses, in the arrested for Suspicion, for Federal Cffenses, for Lunacy, and all Table Showing, in Condensed Form: Citizenship & Employ 1100 those committing offenson handled in Municipal Court, those newstad for Suspicion, for Federal Cifenses, for Lunacy, and all Cases, except Murder or some particularly heinous crime, are ordinarily closed at the end of thirty days, being then held in the Records Division for future development. One of the reasons for these reports is based on the theory that any citizen, offended against from a property standpoint by a burglar, robber or other thief, or against his person by an assailant, in the form of shooting, cutting or other assault, has the right at all times to know what is being done by the police department to right his wrong, and if the Records Division has no reports on his case, on the face of it, it looks as if no effort was being made to solve his complaint, even though the investigating officers are working conscientiously and doing their very best in the case. This rule about reports is seriously objected to, for if the percentage of clearances is small and the volume of reports citing no results is large, naturally it is not to the credit of the officers who make them. On the other hand, there is no question but what this rule has stimulated many officers to greater activities in solving cases, particularly those of a felonious nature. The opposition resulting from this second source bears out the prediction I made when the Records Division was first considered, which was that within thirty days after its inception whoever was placed in charge of it would be the most unpopular member of the Police Department. But regardless of the opposition the aims and objects of the Records Division are being attained. A large number of the officers are making out their reports properly and if they are not sure just what to do, do not hesitate to come to the Records Division for information. It will take some time, of course, to make the system anywhere near 100 percent perfect, and lots of patience on the part of all concerned is necessary. There are a number of features still to be added to the activities of the Records Division before I will be satisfied. The first is the Modus Operandi (Method of Operation). This system calls for the indexing of all salient features of any felony and of some misdemeanors. For instance: in a burglary, where was entrance gained; if a window, which one, how, description of instrument used, if any, as to width and thickness, what was taken, what valuables were not taken, etc. In a robbery: the exact command or words used by the robber should be indexed, as the same offender most always repeats them, and by having a record it is possible to fasten more than one offense against an arrested person. There are innumerable things pertaining to offenses which should be indexed and filed under the Modus Operandi system, which must be in charge of one person only, as several persons would index differently and thus render the file worthless. It would take either a 3 x 5 or 5 x 8 steel filing case; but owing to the financial condition of the City it is not likely we can do much along this line during 1934. This same financial condition is, I am afraid, going to stop us from having another important and necessary adjunct added to our department. It is that of a Ballistics and Allied Research Laboratory. While the Detroit Police Department has always willingly aided us in our homicide cases in so far as the ballistic feature is concerned, and at no cost to us, it is a shame that we have asked so much of them.

the investigating officers are working conscientiously and doing and police department to right his wrong, and if the Records as if no effort was being made to solve in the face of it, it looks the investigation has no reports on his case, on the face of it, it looks the investigation investigation officers are working conscientiously and define One of the reasons for these reports is based on the point by a burglar, robber or piner thisf, or against from a property standay an assailant, in the form of shooting, outling or other assailant, in the form of shooting, outling or other assailer, has the right at all times to know what is being done by an experiment to right his wrong, and if the Records Cases, except Murder or some particularly heinous crime, in the Records Division for future development, If we had had to have this done by a private expert, it would have cost us much more than the lenses and other necessary apparatus. I have taken this matter up several times with Lieutenant Quackenbush and Sergeant Payne of the Detroit Department and I believe we can get a good start for about \$200.00. I am so much interested in research work of this nature that if I was assured that a competent man would be detailed to handle this kind of work, I could arrange to get sufficient equipment to establish, at least on a smaller scale than Detroit, a ballistic bureau as an adjunct to the Records Division. I trust this matter will receive some attention from the "powers that be". In conclusion I cannot help but say a word of commendation for the loyalty and the unselfish manner the men in this Division have worked since its inauguration. But two of them were familiar with clerical work, but they all have worked hard to follow the details of the system as it was laid out to them, and in a very harmonious manner. Due to the fact that the Records Division is open twenty-four hours each day of the week, necessitating three sets of clerks and having no supervising officer to take care of the night work, it has been necessary for the undersigned to work a lot of extra hours, which, with the gratifying results that have been attained, those hours are not begrudged and many more are at the disposal of the Division, if it will aid in any manner to promote efficiency. I wish to thank you, as well as your predecessor, for the keen understanding of the work we are trying to do, as well as the interest shown for a successful attainment of our objective. Respectfully submitted, Q. J. M. Gley R. F. McKey, Records Division.

If we had had to have this done by a private expert, it would have I have taken this matter up several times with Lieutenant lieve we can get a good start or several times with Lieutenant where a good start for about \$200.00. I am so much near a competent man would be detailed to handle this kind of adjunct to the Records Division. I thus builded to a smaller acale than Detroit, a ballistic buries as an acade an eater to the Records Division. I thust this matter will record to the Records Division. I thust this matter will re-

To R. F. McKey, Inspector, Records Division

From John H. Louy, Supt., B. of I. & R.

Subject Activities for the year 1933

- 1003 New subjects were registered by being photographed and remugged, finger printed and signalments taken.
- 11110 Photographs were taken of said subjects.
- 7371 Sets of finger prints were taken of the above subjects.
  - 363 Subjects already on file were re-mugged.
- 1211 Subjects already on file were re-fingerprinted.
- 1003 Photographs, with finger prints and signalments were sent to the Department of Justice at Washington, D. C.
- 1003 Photographs, with finger prints and signalments were sent to the State Bureau of Criminal Identification at Columbus, Ohio.
- 1003 Photographs, with finger prints and signalments were sent to the Mich. State Bureau at Ionia, Mich., for use in the Bureau.
- 350 Photographs, with finger prints and signalments were furnished the Sheriff of Lucas County, Ohio.
- 1250 Photographs, with finger prints and general description were furnished officials of the United States Government, Police Departments, Penal Institutions and Sheriffs.
- 450 Photographs, with finger prints and signalments were furnished the U. S. Government, Police Depts. and Sheriffs.
- 630 Investigations were made by the Bureau for the office of the Prosecuting Attorney, and of this number we had records on file of 291 subjects, which records were furnished the Prosecutor.
- 873 Complete records were compiled and furnished the officials of the U.S.Government, Police Depts., Penal Institutions and Sheriffs.
  - Several thousand letters were written and telegrams sent on the above mentioned subjects to Police Departments, Sheriffs, Penal Institutions and Prosecuting Attorneys.
- 250 Records were requested from Police Departments and Sheriffs, all of which were received, posted and properly filed away.
- 1040 Records were requested from Penal Institutions, which were received, posted, and properly filed.
- 4389 Records received from the Department of Justice at Washington, D. C., the Ohio State Bureau, the Michigan State Bureau, and were all posted and placed on file.

1043 - Letters, some with photographs attached, were received on criminal subjects, other than those on file, all of which were investigated, answered, indexed and filed.

works taken of said subjects;

Activities for the year

1003 - New subjects were registered by teing photographed and re-mugged, finger printed and algualments taken.

Thousands of circulars wanted by other departments and Penal Institutions, and on which no correspondence was necessary, were received, indexed and filed.

- 1422 Finger prints, with photos and signalments were received from the Ohio State Penitentiary, same were indexed, classified, searched and filed away.
- 801 Finger prints, with photographs and signalments were received from the Michigan State Reformatory at Ionia, Michigan, and were handled as above.
- 1382 Finger prints, with photographs and signalments, were received from other departments and institutions, all of which were indexed and filed.
- 1564 Photographs of subjects already on file were printed.
- 1164 Photographs were furnished the members of the Detective Bureau.
- 1464 Photographs of other subjects were made.
- 2001 Identifications were made on finger prints received, on which a classification appeared or similiar names, received from other departments and penal institutions.
- 201 Investigations were made at the scene of crime for finger prints left and in some cases prints were had and filed away for future use.
- 502 Cards were issued to Taxi cab drivers, each was handled in the usual manner, such as finger printing, indexing and properly filing away.
- 26 Gun permits were issued and properly recorded and filed away.
- 2876 Long Distance calls were handled by the Bureau.

Thousands of cards and circulars were issued for wanted persons, stolen autos, etc.

186 - Checks were examined by our hand writing expert for forgery and similarity of writing.

Thousands of letters received by the Department on subject matters other than criminal, such as Missing Persons, etc., after being investigated by the Detective Bureau, were answered and filed away.

Respectfully submitted,

John H. Louy, Superintendent, Bureau of Identification and Records.
