TOLEDO POLICE DIVISION

DIRECTOR OF PUBLIC SAFETY

CHIEF OF POLICE

* Proposed

BUREAU of PLANNING & RESEARCH

In a move to improve overall efficiency within the Division, the Bureau of Planning & Research was established on August first replacing the Office of Special Services. The Chief of Police had long seen this as a vital addition to the operation. This unit was also a major recommendation of the Citizen's Committee for Effective Government. The process of planning is important to the police field and to this Division in particular. The Division must continually clarify it's goals and objectives, and, at the same time, develop methods and procedures of action to achieve these newly defined goals. This is the planning process.

An important function of the new unit will be developing applications for federal grants and administration of these grants when they are awarded. Many opportunities are being presented by the Law Enforcement Assistance Administration for police departments to develop new or improved programs which will enhance their operations. In order for Toledo to give maximum service to the community, improve efficiency and make each officer's work more satisfying, we should try to make optimum use of any funds which can be applied to our own operations. In line with this, several projects were initiated before the end of the year by the new staff. These projects included LEAA applications for grants to be used for Planning & Research and another to expand our lab facility into a new Regional Crime Laboratory.

With all the usual problems encountered in forming a new unit out of the way, it is expected that 1974 will demonstrate quite graphically the value of this new addition to Division operations.

POLICE ACADEMY

The academy graduated two classes of new recruits during the past year. The first of these was on January 19 and the second on July 27. This last class was the first to receive the new 17 week basic training course, instead of the 13 weeks which was offered previously. In addition to these two Toledo Police Division recruit classes, a 240 hour basic course was begun on November 12 for twenty-six area law enforcement officers.

A new program, not only for the academy, but the Division as well, was developed and presented during the year. This was a "One-man Patrol" course which was given to eighteen Toledo officers who were volunteers in a special program to test the applicability of one-man cars this city. If successful, the program would be expected to be expanded in the future.

A special in-service training program of gigantic proportions was successfully completed in the final weeks of the year. This was necessitated by the implementation of a new Ohio Criminal Code which was to go into effect on January 1, 1974. In line with the new code, the Ohio Peace Officers Training Council mandated that all officers in the state had to have 40 hours of training in the new code prior to that date. Since it was already the first of November, the decision was made to use regular command officers to supplement the regular Academy staff. In just two

months, these instructors were trained and the forty hours of training for all personnel was completed. To accomplish this task, the classes were given on a 24-hour basis 7 days a week, to allow all officers to attend while on duty. This training involved 758 officers and 28,804 student-hours of instruction.

As an important addition to the academy resources, a video capability was added during the year. Cameras, monitors, and taping equipment were added with the assistance of a federal grant. Films, texts and other gear were also purchased under this project.

DETECTIVE BUREAU

During the past year, the bureau was consolidated into one area when those segments which had been isolated were moved back into quarters adjacent to the bulk of the operation. This move has resulted in improved communications within the bureau.

In April, communication with detective units out in the field was greatly enhanced with the installation of a remote transmitter in the Detective Bureau. This innovation, made possible by the new communications system, allows bureau personnel to communicate directly with the bureau, instead of having to use the dispatcher as a relay as in the past. With the expanding use of portable radios by detectives, constant contact can now be maintained between the unit in the field and his supervisor.

The Check Alert network, started in 1972, has now been in operation for a full year. This allows information on bad checks to be disseminated to a number of locations simultaneously after being received by the Police Division. During the past year, this network allowed the broadcast of 1,353 check alerts. This information was sent to the four largest supermarket chains and all branches of five local banking institutions.

Three auctions were held during the year to dispose of property which had been impounded and not claimed. These auctions involved autos and coins which are not handled by the Division's regular unclaimed property auctions. These sales returned funds to the General Fund in the amount of \$6,581.59.

CRIME PREVENTION BUREAU

In the past year, three male investigators and two policewomen were added to the bureau bringing the total assigned to forty-six. The Ohio Youth Commission is subsidizing the bureau by picking up a portion of the three male officer's salary. The boost in personnel was indeed fortunate in view of the increases in most categories in 1973.

The Crime Prevention Bureau received, investigated and disposed of 9,899 complaints, an increase of 25%. Missing persons continued to increase, with a total of 3,160 Missing reports, up 4.7%. Juvenile arrests for the year amounted to 6,318, an increase of 17.8% over 1972. Of these arrests, 1,196 were charged with Class I offenses, up 241 from the previous year. The largest increase was in burglary which increased 129 over 1972. 414 adults were arrested by bureau personnel reflecting an increase of 12.1% over the prior years data.

During the past year, representatives of the Crime Prevention Bureau spoke before 95 different groups to an estimated 5,780 people.

Our objectives for 1974 are to increase the detection of juveniles in serious crimes, increase the clearance rate, and improve cooperation between police officers and the citizens we serve. In an effort toward attaining these goals, all investigative personnel, excluding certain specialists, have been divided into two groups. Each of these groups is responsible for complaints originating in one of the two radio zones established recently.

MORALS AND NARCOTICS

In addition to normal enforcement activities under laws of the state of Ohio and Toledo city ordinances, the Morals and Narcotic squad has primary responsibility in the areas of gambling, prostitution, liquor regulations, pornography and narcotics laws.

Inspections of the approximately 1,000 liquor permit holders is a tremendous task in itself. The squad often works in cooperation with agents of the Ohio Department of Liquor Control and enjoys an excellent relationship with that agency. Officers also conduct investigations of premises and owners prior to the issuance of new permits or transfers of permits. In relation to this, objections were filed against nine applications in 1973.

An overview of the activities of this unit gives the following breakdown:

<u>ACTIVITY</u>	<u>NUMBER</u>
<u>ARRESTS</u>

BUREAU OF INTERNAL AFFAIRS

The creation of the Bureau of Internal Affairs in the past year was the result of the recommendation of the Chief of Police. This recommendation was based on the necessity to provide an internal investigation unit within any large police department to improve citizen trust, respect and cooperation. An appreciation of this philosophy imposes upon this Division the responsibility of providing a system of complaint and disciplinary procedures. These should be so designed that they will not only subject an officer to corrective action when he conducts himself improperly, but will also protect him from undeserved abuse, or punishment, when he discharges his duties properly.

The proper relationship between the police and the public they serve, fostered by trust and confidence, is essential to effective law enforcement. Police officers must be free to exercise their best judgement and to initiate action in a reasonable, lawful, and impartial manner without fear of reprisal. At the same time, the officer must recognize and observe the rights of the people they serve.

After eight months of operation, the Bureau of Internal Affairs presents the following data.

Case disposition to date

Closed cases	258
Inactive cases	14
Open cases	<u>7</u>

CRIME LABORATORY

During the past year, the Crime Laboratory noted a very sharp increase in narcotics examinations sent in for analysis. A natural by-product of the increased activity in drugs, the lab staff was soon bogged down by the extra work-load. Fortunately, relief was in sight in the form of a grant from the Law Enforcement Assistance Administration which funded the hiring of a civilian chemist. Narcotics examinations were soon caught up with and the problems were eliminated.

Plans are now in the formative stages to expand the present lab in 1974 to a Regional Crime Laboratory concept. This will also be accomplished with the aid of an LEAA grant.

POLICE HUMAN RELATIONS BUREAU

1973 was a year in which great strides were made in the operations of this bureau. With the addition of six personnel, it became possible to assign an officer to each of the public high schools, and one other to all parochial high schools. Each of these officers also had responsibility for the various feeder schools in his district. We feel that these assignments resulted in a much closer relationship between our officers and high school students, teachers, and school administrators, with a positive spin-off effect on the families of these students.

The added personnel also allowed this bureau to cover all athletic contests and other school social functions. The value of this expansion is clear by the fact that there were no reported disturbances involving any of the schools during the fall of 1973.

BUREAU OF IDENTIFICATION & RECORDS

This bureau processed a total of 71,236 offense reports during the past year. Since each offense report generates an average of three additional reports, the total number of reports handled is approximately 213,708. This was in addition to 10,164 requests for automobile tows and related functions.

Microfilm equipment in the form of a camera, reader and printer has been added to the Records section with the help of federal revenue-sharing money. Also, bids for equipment for the new Word Processing Center have been received and orders made to successful bidders. This project was also made possible with federal funds in the form of an LEAA grant.

Other major activities for thr year were as follows:

<u>ACTIVITY</u>	<u>1973</u>	<u>1972</u>	<u>% Change</u>
Auto tows	10,164	10,119	+ 0.4 %
Offenses processed	71,236	65,159	+ 9.3 %
Communications	74,814	73,711	+ 1.4 %
Case records proc.	14,255	13,211	+ 7.9 %

Photos taken	300	235	+27.6 %
Prints made	28,094	23,378	+20.2 %
Fees collected	\$16,141.00	\$13,166.00	+22.5 %

COMMUNICATIONS BUREAU

The new five-channel communications system became fully operational on the first of September, 1973. It has already shown itself to be a great improvement over the old single-channel radio system used previously. The Division now has two channels for patrol use, one channel for investigators, another channel for inquiries, in addition to a fifth channel which is kept free for area use. Complementing the system is a feature which allows simultaneous broadcasting over all channels when the need arises. To improve security in this area, TV monitoring equipment was installed to allow surveillance of anyone who wishes to enter, along with an electrically controlled door.

Bureau Statistics for 1973

City of Toledo Area----- 88 sq. mi.

Estimated Population----- 386,700

<u>Activities of each relief</u>	<u>0645 x 1445</u>	<u>1445 x 2245</u>	<u>2245 x 0645</u>	<u>Total</u>
Answered calls/service	76,816	115,074	81,345	273,235
Percentage of total	28 %	42 %	30 %	100 %
Change over 1972	+ 709	+ 5,333	+ 14,385	+ 20,427

Private ambulances dispatched

1973	10,203
1972	9,752
Change	+ 451 (4.6%)

In addition, 4,312 18-hour parking complaints were received and processed during 1973.

COMMUNICATIONS BUREAU

			INCREASE -	20,427

Total - Answered calls for service in 1973----- 273,235

Increase in Total answered calls for service over 1972----- 20,427

Private ambulances dispatched for 1973----- 10,203

Increase in private ambulances dispatched over 1972----- 451

(Total for 1972 - 9,752)

In addition to the above - a total of 4,312 18-hour parking complaints were serviced.

TRAFFIC BUREAU

Several new developments occurred within the Traffic Bureau during the past year. Foremost among these was bureau participation in the federal program known as F.A.R.E. (Fatal Accident Reduction through Enforcement) which was administered by the Ohio Department of Transportation. During the three months of operation in Toledo, we were able to show a reduction of four fatalities from projected figures. This was mainly credited to the 3,000 additional citations which were issued by bureau personnel assigned to the F.A.R.E. program.

Another important development was the streamlining of the Accident Investigation operation. These units have all been converted to one-man units. We now have only twelve officers assigned to this function compared to eighteen under the two-man system, yet we have two additional units on the street.

All in all, 1973 could be considered a rather successful year with most of our accident statistics remaining fairly constant. The only exception to this was in fatalities which showed an increase of 25%. This increase would no doubt have been significantly greater had it not been for the F.A.R.E. program which halted the trend established early in the year.

The Bureau's hit-skip operation is still a very successful operation with over one-half of the on-street violators being apprehended and taken into court, only two were found not guilty.

The Police Aide function of school crossing guard was supplemented by the addition of seventeen part-time civilian guards. This expansion has resulted in many more intersections being protected at a much lower cost.

The junk auto program continues to be a great success. This unit removed 770 junked autos which had been abandoned on the street and another 1630 from private property. This unit also issued 4,332 parking tickets for 18-hour parking and towed 219 vehicles for violations, in addition to their other duties.

Traffic Bureau Statistics for 1973

<u>Activity</u>	<u>1973</u>	<u>1972</u>	<u>% Change</u>
Total accidents	22,976	22,476	+ 2 %
Fatalities	50	40	+ 25 %
Persons injured	4,732	4,726	+ .001 %
Moving violations	72,519	69,997	+ 14 %
Moving fines	\$1,309,498.09	\$1,108,973.36	+ 18 %
Parking violations	88,148	90,827	- 2.9 %
Parking fines	\$384,093.00	\$313,152.00	+ 22.6 %

HARBOR PATROL

The Police Division Harbor Patrol, consists of one craft and three patrol men, was in operation from April 1, 1973 to October 31, 1973. During this period, the personnel spent 227 hours patrolling the Ottawa River, 159 hours on Lake Erie and Maumee Bay, and 500 hours on the Maumee River. This was in addition to many other activities the unit is involved in. A brief summary of these activities follows:

Five (5) drowning victims were recovered involving 56 man-hours

Six stolen boats and two motors were recovered

Five oil spills were discovered

Severe weather warnings were given to boaters on 37 occasions

Six persons were arrested for violations

347 warnings were issued for violations

193 copies of municipal boating ordinances were distributed

62 navigation hazards removed from waterways

101 boats were either towed or otherwise assisted (est. value \$250,000)

Fourteen persons were rescued from capsized boats

254 hours were spent patrolling 25 regattas which involved 738 participating craft and 1,965 spectator craft

Three boating accidents were investigated, all non-injury

SCHOOL SAFETY

The year of 1973 is one which gives much satisfaction to the personnel involved in our school safety traffic program. A new educational format which has been developed and placed into operation appears to be very successful. During the year 1973, there were 223 accidents involving school children compared to 268 in 1972. This is a decrease of 16.8% and reflects statistics on all school children from grades one through eight. At the same time, Toledo experienced a 10.2% reduction in bicycle accidents.

Programs In Use By The School Safety Unit

Safety Coloring Book for kindergarten and first grade
Bicycle Program for in-school training on care and riding, and licensing
Bicycle Identification Cards containing pertinent information on riders
Summer Bicycle Program - safety training and licensing conducted in parks
Safety Guard of the Day awards to school guards through local radio station
Patrolman Jim Program - for pre-schoolers on cable TV
Driver Education Program for high school level classes
