OFFENSES KNOWN TO THE POLICE, BY CENSUS TRACT HAPPENED

The first eight Census Tract totals, shown below, remain in approximately the same ranking as they have for the past several years. These totals include all three Uniform Crime Reporting classifications, but does not include non-criminal services.

Tract #28, the downtown business district, should not be used for any comparative purpose as we have the concentration of all known conditions existing there offering the opportunity for the commission of crime. 5.5 percent of all crime was committed in this tract; 1.3 percent in tract #34 and .2 in tract #29, following with a decreasing average from three offenses each day to one a day in Tract #51, and with less than one per day for the balance of the tracts.

| 2. 0-10 miles per hour ----- | 4709 | 5482 |

| 8. Not stated ----- | 1715 | 1536 |
| | 28474 | 28893 |

The above approximate speed tabulation indicates that most accidents occur at speeds between 11 and 20 miles per hour. This could show that high speed in itself does not cause accidents but that speed too fast for conditions is the major cause. However, speed given by an operator to the investigation officer following an accident is an estimated speed, and not the true speed of the car involved. Consequently the above tabulation is of little value to enforcement officers.

The above summary includes all types of moving arrests by two Radar Crews.

We do not believe that radar arrests are the sole solution of our traffic problem, but we know that speeding has diminished on the streets where radar had been active. We believe that radar with selective enforcement is a long stride in eliminating reckless driving, speeding and other violations that are the causes of traffic accidents.
