

1972 ANNUAL REPORT

CITY OF TOLEDO, OHIO - DIVISION of POLICE

ROBERT J. DUCK
CHIEF OF POLICE

It is my privilege to submit the 1972 Annual Report of the Division of Police in compliance with the provisions of section 107 of the Charter of the City of Toledo, Ohio.

CITY OF TOLEDO OHIO

CITY OF TOLEDO
DIVISION of POLICE

During 1972, as in preceding years, the work of the Toledo Police Division accelerated to record levels. A continuous rise in crime, increased criminal activity and multiple called-for services to the public all contributed to the taxing demands on police facilities and manpower.

While continuing to meet the broad challenges of these varied community and crime problems, the Division continues to move ahead with on going programs and plans for future programs designed to insure and to increase the proficiency and competency of every officer. The implementation of our new five channel radio system is a vital progressive step in this area.

It is our hope the year 1973 will see the creation of a formal Planning and Research Section. This much needed adjunct to our organization will enable us to develop our resources and activities in an orderly and viable manner.

Robert J. Duck
Robert J. Duck,
Chief of Police

TOLEDO CITY GOVERNMENT

HARRY KESSLER
MAYOR

Toledo, Ohio's fourth largest city is the seat of Lucas County. It is located on the western shore of Lake Erie and is the major trading center for Northwestern Ohio and Southeastern Michigan. Its 384,000 residents live in an 86-square mile area. Toledo, the "Glass Capital of The World" is one of the nation's most important distribution centers.

Toledo is governed by a nine-member council, elected at large, led by the mayor, elected directly by the people. The city manager is the administrative head of the city government and discharges council's directives.

The Toledo Police Division is headed by the Chief of Police and is under the administrative control of the Director of Public Safety. The Division motto is

"To Protect and To Serve"

JAMES B. DAKEN
CITY MANAGER

DONALD R. SHANTEAU
DIRECTOR OF
PUBLIC SAFETY

ADMINISTRATIVE STAFF AND UNIT COMMAND

CHIEF OF POLICE - ROBERT J. DUCK

BUREAU OF SPECIAL
SERVICES AND INFORMATION

The Bureau of Special Services and Information, established by Chief Robert J. Duck, has completed its second year of operation. During this second year, this unit has endeavored to contribute new programs and new ideas to increase the overall high performance of our Police Division.

SUMMER PARK AIDE PROGRAM

At the end of the year 1971, there remained approximately \$94.00.00 unexpended from the Federal Discretionary Grant. An application for an extension of the program was approved and we were able again to place these aides in the various recreational areas of the city. As, during the previous year, the number of incidents in these areas decreased drastically because of their presence.

POLICE AIDES

The Police Aide Program, which since its inception has been under the supervision of this bureau, was transferred as of September 1, 1972, to the Traffic Bureau. The complement has remained static at twenty-one. The number of school crossings guarded has increased to twenty-nine, but over half of these are under the protection of part-time crossing guards. Aides were also assigned to the Art Museum and to the adult swimming pool areas during the summer. In 1972 the aides placed a total of 24,931 parking tickets.

PART-TIME SCHOOL CROSSING GUARDS

This program, initiated in September of 1971, now has nineteen ladies to guard the school crossings on an as needed, part-time basis. This program has been extremely successful and the turnover in personnel has remained at a minimum. The use of these ladies, rather than the full time Police Aides at the school crossings has resulted in a very substantial saving in the general fund.

FEDERAL GOVERNMENT GRANTS -
OMNIBUS CRIME BILL

The Toledo Police Regional Communications System is now being implemented and should be operational in January of 1973. A grant for third year funding (1972) has been submitted and approved.

The Toledo Police Division Academy Library has received \$12,000.00 in new equipment from a grant.

Delivery has been received on the new Police and Fire Reporting Boxes; this also as the result of a grant.

A grant in the amount of \$6,207.00 was received for the renovation of the Toledo City Jail. This, along with \$10,000.00 from the Capital Improvements fund will allow the implementation of many much needed improvements.

Pre-applications were submitted to the Toledo Toledo-Lucas County Criminal Justice Regional Planning Unit for several projects, but only one for a Word Processing Center in the amount of \$49,000.00 was approved.

TOLEDO-LUCAS COUNTY CRIMINAL JUSTICE
REGIONAL PLANNING UNIT

The first organizational meeting of the Regional Planning Unit was held on March 6, 1972. Lieutenant James B. Weis was appointed the Interim Director at that time and immediately began the task of placing this unit in operation. This involved the leasing of quarters, purchase of furniture and supplies, hiring of staff and many other associated duties. It was necessary also to present an approved budget.

In June of 1972, Mr. Gary Pence was appointed the permanent Director. During the previous months Lieutenant Weis devoted 90% of his time to the project and the monetary contribution in salary saved amounted to \$6,725.00. Since the appointment of the permanent director, Lieutenant Weis has acted as an advisor and has attended most meetings of the Supervisory Committee and the Executive Committee.

SUGGESTION PROGRAM

The members of our division have continued to submit suggestions and all have been acknowledged. They are reviewed as to merit by the Chief and his staff and some have been implemented.

LETTERS OF APPRECIATION TO CITIZENS

The good citizens of our community continue to give valuable assistance to the Police Division. In all incidents where the name of the citizen can be obtained, a letter of thanks is sent from the division over the signature of the Chief of Police. Ten letters were sent during 1972.

SCHOOLS FOR UPGRADING OF POLICE PERSONNEL

Twelve command officers attended the Senior Officers Civil Disorders Orientation Course at Fort Gordon, Georgia.

Patrolman Matthew Chmiel attended the Hazardous Devices Course at the Redstone Arsenal in Huntsville, Alabama.

Twenty-two sergeants attended the school for Breathalyzer Training in Columbus, Ohio. Patrolman Richard Zielinski of the Police Division Crime Laboratory has been trained as an instructor and can now give all the necessary instructions in Toledo. This will

eliminate the many trips to Columbus, Ohio which were necessary in the past.

POLICE DIVISION COMMENDATION PROGRAM

Commendations for one hundred seventy-six members of the division were written. Also written were several letters of thanks to members of other police jurisdictions who aided our division. Commendations continue to be a great booster of morale, especially since a copy is placed in the personnel file of the recipient.

PLANNING AND RESEARCH

Planning and Research continues to be the primary function of this bureau. More man hours have been spent in this area than in any other during the past year. The formation of the Regional Planning Unit, in particular, required a great amount of research and the award of a grant by the Department of Urban Affairs was achieved only after many hours of tedious work.

Many inquiries were made and many received from other police jurisdictions. All were answered.

Trips were made to Cincinnati and Columbus, Ohio; Atlanta and Savannah Georgia; Minneapolis, Minnesota; New Orleans, Louisiana; and Charleston, South Carolina to participate in various seminars.

MICROFILMING PROGRAM

A program is now being initiated in the division to microfilm all pertinent records. This will include current reports and those which are still active from the past.

The implementation of this program will allow the discarding of those records which no longer need to be kept.

MISCELLANEOUS SERVICES

The staff of the bureau continues to serve on various committees and to attend meetings as instructed by the Division Administration and the City Manager.

We have endeavored to answer all inquiries from the members of the division. A sincere effort is made to evaluate all rumors; to find the source of and refute or confirm.

CONCLUSION

While crime control and the ultimate reduction of crimes are the central concerns of the Bureau of Special Services and Information, the manner in which these objectives are pursued is also significant. We are constantly seeking new programs, new ideas and new methods of improving our police service.

Our police division operates today in the most advanced society in the world. This level of technological development brings social problems of an equally complex nature. These are the problems that our personnel face on a daily basis.

If our police division is to continue its efforts to implement new procedures to better fulfill its basic objectives, the area of Planning and Research must be enlarged. We cannot respond to the problems of our city if we remain static in our procedures.

TOLEDO POLICE ACADEMY

PHYSICAL CONDITIONING PROGRAM

Under the guidance and supervision of the Academy Staff, the Division's Physical Conditioning Program is making progress and is being utilized by the recruit class twice weekly for physical training and combat exercises.

TRAINING PROGRAMS

Supervision Courses

The Police Academy Staff, in compliance with orders of the Chief of Police, initiated correspondence with the FBI to provide instructors for a Supervisory Mid-Management Course. The Academy Staff, coordinated schedules and provided administrative support for a Mid-Management Course for our command officers.

The first course was conducted from January 17 to January 21, 1972, and was completed by twenty-five command officers. The second course was in session from November 6 to November 10, 1972, and was completed by twenty-eight command person-

nel and four area law enforcement supervisory officers.

Chemical Agents & Equipment Courses

The Academy Staff structured and presented two Chemical Agents & Equipment Courses for command officer of two days duration. The first class was held in February and the second was conducted in March.

Criminal Investigation Course

The Academy Staff organized and scheduled a Criminal Investigation Course for our patrolmen, which was in session from April 4 to May 11, 1972. A total of sixty-four officers attended the course.

Shotgun and Carbine Training

The staff of the Academy provided Shotgun and Carbine Training at the Adams Conservation Club range for division uniformed officers.

Special Weapons and Tactical Unit

The Academy made arrangements with the FBI to train a five man team, consisting of a lieutenant, sergeant and three patrolmen, from our division as a Special Weapons Tactical Unit.

These officers attended a course of training at Quantico, Virginia from June 5 to June 9, 1972. The command officers of this tactical unit have trained fifty-three additional officers, providing each uniformed relief with special weapons and tactical trained personnel on a twenty-four hour basis.

Demonstration of Chemical Agents and Firearms

Arrangements were made with the Standard Law Enforcement Equipment Company and the Smith and Wesson Firearms Company to provide demonstrations of police equipment at the Adams Conservation Range. There were two sessions devoted to this demonstration, which enabled Toledo Police personnel and twenty-nine area law enforcement officers to attend.

Academy Library

The Academy Library made seventy-two book loans to division officers, and was used by members of the Toledo Civil Service Commission for research purposes.

The Academy Staff reviewed various publications to determine their suitability for addition to the library stock. Nine texts were added to the library stock and acquisition of additional volumes is under consideration. There were twenty-nine book sales made to regular members and the Academy purchased over two hundred texts for the police recruit class.

Training Aids Acquired

A motion picture film and a complete set of film strips were purchased from the International Association of Chiefs of Police for use in recruit and in-service training programs. Film loans were made for twenty-six showings and eight projector loans.

Federal Grants for Training Aids

The Academy was granted twelve thousand dollars in Federal Grants to purchase audio-visual aids and related training equipment. We have received the following:

- Video components
- sight and sound film strips
- training films
- 16 mm projector
- screen
- table
- overhead transparency maker

Additional equipment is expected to make planned training programs operational.

RECRUIT TRAINING

Investigations

The Academy Staff assisted with the background investigations of one hundred seventy-three Fire Division applicants during January and February of 1972.

They also conducted two hundred and fifty-two background investigations of police applicants, and a staff member participated with other police officials in the interview process of one hundred sixty-one police applicants.

Recruit Class Training

A police class of forty-eight recruits, of which forty-six are provisional appointments and two permanent appointment, was inducted on October 16, 1972. The Academy Staff commenced a fourteen week training course for the cadets, which is scheduled to be completed on January 19, 1973.

PLANNING AND RESEARCH

The Academy Staff provided research assistance in the form of books, periodicals and technical advice to eighteen individuals and/or organizations seeking assistance.

The staff participated in a total of eight conferences and provided three lecturers at the request of various organizations with the sanction of the Chief of Police. Conferences were held with Civil Service officials concerning police recruit examinations. There was coordination with IBM computer officials concerning classification of skills and qualifications of police personnel.

Lesson plan outlines were constructed for Police Academy instructors and outside lecturers.

A fourteen week recruit training curriculum, in compliance with the Ohio Peace Officers Training Council requirements, was formulated for use in training the recruit class which was enrolled October 16, 1972.

The Academy Staff planned, researched and revised approximately eighty per cent of a proposed new rule book for the division. Research was conducted and reports were submitted concerning One-Man Patrol Cars, and a curriculum was structured to train officers in this type of operation.

INVESTIGATIVE BUREAUS

Several new procedures and modifications were adopted to improve the efficiency of the Detective and Crime Prevention Bureaus. These changes have resulted in personnel having more time for investigation.

DETECTIVE BUREAU -

Check Alert -

A closed telephone network was established in cooperation with the Chamber of Commerce, whereby information on bad checks is given simultaneously to some forty locations in a matter of minutes after being received by the Police Division.

Under the old system two men spent two hours each on the task of notification. It is operated without cost to the city and has greatly reduced complaints of checks being passed by pro-mobs.

Latent Print Searches -

All personnel were trained in making crime scene searches and provided with the necessary equipment. It has permitted an immediate search before the scene is disturbed and eliminated the need to send technicians in the majority of cases.

Crime Scene Photos -

Training was given and cameras provided to enable the investigators to photograph crime scenes, except homicide and robbery, immediately upon arrival at a great savings of time.

Recorders -

Cassette recorders have been made available for use by the investigators to record notes statements, etc.

Steno Pool -

Four stenographers have been employed to take dictation and type reports of the investigators. They also transcribe statements and other forms. When they are not available, the investigators dictate reports on tapes for transcription later. The majority of the investigators are not trained typists and considerable time is saved and the quality of the reports has improved.

Incident Maps -

Spot maps marking locations of reported auto, burglary and robbery complaints are being maintained on a monthly basis.

The basic purpose is to provide the uniform section with pertinent and timely information.

A mid-month summary is issued for division distribution. At the end of the month maps are photographed for later comparison. A copy is posted in the Patrol Assembly Room. At this time a profile map of the high crime area is published and distributed to each member of the police division.

Abandoned Motor Vehicles -

A system has been devised under Ohio Revised Code 4513-60 whereby approximately 1,100 vehicles were disposed of in the last quarter of 1972 with no cost to the city.

Conclusion -

The success of these procedures is reflected in part by noting that Class I offenses in 1972 were reduced by 2%:

1971	21,981
1972	21,567

It should be noted that despite a reduction in investigative personnel, clearances increased 3.3% in 1972:

1971	25.3%
1972	28.6%

The above figures do not include 907 reports made, investigated and determined to be unfounded.

CRIME PREVENTION BUREAU

The 1972 statistics again reflect a reduction of juvenile offenses in Toledo. During the period from 1967 through 1970 the bureau was processing over 6,000 juveniles a year. In 1971 the number dropped below 6,000 and this past year it again decreased to a low of 5,417. The number of juvenile offense complaints received by the bureau in 1972 was 7,917, the lowest since 1968. The number of children referred to Juvenile Court by this bureau has been steadily reduced, reaching a low in 1972 of 2,067.

Although it is not felt that the police division is solely responsible for this apparent reduction in juvenile crime, we do feel that it has been instrumental. The Crime Prevention Bureau has made an effort to investigate every juvenile complaint received, no matter how petty, and in these cases to resolve them without court referral, if possible.

Crime Prevention Bureau officers, in cooperation with Selective Enforcement and shift officers, have worked innumerable specials, such as football and basketball games, festivals and other high hazard situations with very good results. This, we believe, has been a factor.

It is felt that the Crime Prevention Bureau has operated more efficiently and effectively this past year than ever before. The Bureau now has two reliable tape recorders and the services of two stenographers. In addition, the command officers in the bureau are now fully occupied with supervisory tasks and are working to improve the operation and efficiency.

Representatives of the Crime Prevention Bureau this past year have given eighty talks to an estimated 4,000 people. In addition, we are represented on the following committees and boards: Model Cities Crime and Delinquency Committee; Bureau of Community Relations Youth Advisory Board; The Bridge, Inc.; United Central Services; Big Brothers; Regional Youth Service Bureau and the Regional Planning Unit.

It is felt that our participation in programs and affairs outside the Police Division are beneficial to the Division in respect to police-community relations.

For 1973, if sufficient personnel permits, we would like to increase the number of units on nights in an effort to further reduce delinquency and juvenile crime.

POLICE COMMUNITY RELATIONS BUREAU

In an effort to bring about a better understanding of the Police and the role of the Police in the community, members of the Police Community Relations Bureau were able to make personal contacts with a total of 25,857 citizens of the City of Toledo, by conducting tours of our Police Division facilities, public talks, attendance at community meetings, etc.

Their greater involvement in the community is reflected in the number of investigations undertaken - 575 in the year 1972 as compared to 401 in 1971, and in interviews completed - 6,314 in 1972 as compared to 4,333 in 1971.

During the summer of 1972, under the Mayor's program to employ youth and in cooperation with the Model Cities Agency and the Toledo Board of Education, three college students and eight high school students worked with members of the Police Community Relations Bureau for eight weeks, conducting a survey of Community organizations within the city. This project has given the bureau an updated record of the memberships in these various organizations.

The Police Community Relations Bureau's activities also included the investigation of complaints referred to us by other bureaus. Most of these involved misunderstandings and were resolved to the satisfaction of all parties involved.

Serious Offenses is a term used to measure crime. It includes seven offenses: Murder and Non-Negligent Manslaughter, Forcible Rape, Robbery, Aggravated Assault, Burglary-Breaking and Entering, Larceny \$50.00 and Over and Auto Theft.

The population estimate used as a basis for the crime rate follows: 1972 Estimated Population is 385,500; 1971 Estimated population is 383,818; 1970 Estimated population is 383,818; 1969 Estimated population is 382,000; and the 1968 Estimated population is 381,000.

COMMUNICATIONS BUREAU

The first fundamental area of change, in terms of support to the implementation of the Toledo Police Division's multi-channel radio system, was the adoption of a combination complaint ticket and dispatch form. After several months of evaluation, a new dispatch complaint form was devised which will replace the present written log and complaint ticket. Information regarding a call must be relayed from the call receiver to the dispatcher, consequently prime considerations were weighed as to the following:

- 1) Importance of obtaining accurate and complete data.
- 2) A form that would suffice as the source document for providing necessary workload statistics.
- 3) Assist the call receiver in capturing the required information regarding the incident and relaying the information to the dispatcher.
- 4) The design of the card, format, color, etc., all having a direct relation on the effectiveness of passing on information.

- 5) Category of incidents, specify type of complaint, don't advise merely see complainant, investigate, trouble unknown, etc.
- 6) Source of incident.
- 7) Number of backup units (attempt to determine if backup units are required and how many)
- 8) Specific location of incident.
- 9) Details of call (has husband threatened wife, has he been drinking, does he carry a weapon? Is the event occurring now, developing, in progress, recent cold, how long ago did it occur?)
- 10) Was a weapon involved? What type? If crime just occurred, direction of travel; means of transportation? Description of suspect/vehicle. Is there any injury involved, medical aid required?
- 11) Who is the calling party? What is the calling party's relationship to call? Neighbor, wife, refuse to identify, request name not be used, chronic complainer?
- 12) Name and address and phone of calling party?
- 13) Type of premise at incident location.
- 14) In crime is in progress, where are front entrance, rear exit, other exits? Location of victims, occupants, employees, suspects, etc?

Being considered for future use are the classification of calls for service. Color coding the dispatch card so that like assignments have the same color. For example, red for urgent, green for expeditious and buff for routine. The color would enable the dispatcher to more quickly determine call priority and if necessary, placed in a priority stacking queue.

The second area of change was to determine whether it was possible to provide more service to the citizens of Toledo with the same personnel. How to provide more service by utilizing manpower and equipment more efficiently? How to redraw patrol districts and allow for more flexibility in the utilization of one and two man patrol units, and assign personnel where the workload most indicated they were needed.

The first major question we had to answer was - How to divide the town into two dispatch zones? Determine if present cruiser boundaries were realistic in the light of volume and location of workload and where to place cruiser boundaries. Consideration was given to the equipment available, density of workload, expanse of area, natural barriers and census tracts. Also considered were appreciable shifts of population due to urban renewal and freeway construction. The realignment of districts was accomplished, the city being split by I-75 and I-475, into north and south sectors or dispatch zones.

In conjunction with the revision of patrol districts, two maps were completed which will provide for the north and south zones and the status keeping function. The two maps provide for a card system with automatic status light indicators.

The third area of change was in the adoption of a limited number of "ten codes" and signals, presently being utilized by many agencies throughout the nation as a universal law enforcement radio code. They are for the most repeated type of radio messages. A limited amount of ten codes should reduce air time and establish uniformity in messages that are presently being broadcast in a non-uniform manner. Ten codes will eventually

provide a means of recording statistical information necessary for resource allocation, such as Code-23, arrival at scene; Code-42, ending tour of duty and the various times associated with calls out of service.

Reference material for 50 slides was completed, to be used for viewing by Communications Bureau personnel. Reduced for this purpose were emergency orders, emergency procedures, revised patrol districts, etc. Yet to be completed is material for 30 more slides, pertinent to the dispatch function. When the dispatcher dials an index number, the tray holding the slides immediately respond by moving into position and gravity feeding the appropriate slide into the projector. The image projects from the rear onto an easy to read, glare proof screen.

Technical and construction work on the new center is being completed as rapidly as possible, with the kitchen, locker room and relocation of offices nearing completion. A complete review is now being undertaken, together with necessary revision of the information files, procedures, orders, etc., now being used in our present system. Upon completion of the review, the revised information will be typed and transferred to reference files in the new operations room.

TRAFFIC BUREAU

The following is a recap of the activities of the civilian personnel in the Traffic Bureau for 1972.

The increase in activity is still being handled by the same amount of personnel. There are eight civilian clerks assigned to the Traffic Bureau. Along with taking accident records, the issuance of taxicab licenses, arrest records, etc., the personnel collected \$370,106.00 in revenue for the General Fund.

The decline in the number of parking tickets hung and the resultant decline in revenue can be attributed in part to fewer police officers and police aides on the street in 1972 compared to 1971.

ACCIDENTS

Total Accidents	22,476	20,084
Fatalities	40	60
Persons Injured	4,726	3,875

Without the increase in speeding arrests, total enforcement would have been down by 3,501 arrests. Traffic Bureau personnel accounted for approximately seventy-five per cent of the enforcement activity of the Police Division.

Total involvement of the uniform patrol in traffic enforcement is necessary to make the streets of Toledo safe to drive on.

In the year 1972, the Toledo Police Division Traffic Bureau implemented and revised several of its programs.

The system of notifying delinquent parking violators has been made more effective with the use of Data Processing. When fully operational, this change will increase the number of collected tickets.

The supervision of the Police Aide Program was transferred from the Bureau of Information and Special Services to the Traffic Bureau. This change will provide for better supervision and better coordination of their activities with those of the bureau.

A partial program of one-man Accident Investigation Units has been initiated and has proven successful.

The officers of the School Traffic Safety Program were moved from the Board of Education headquarters to the Stranahan Building. This closer proximity to the Traffic Bureau gives better communication and freedom of action.

A highly successful effort, a program for pre-schoolers, "Safety Town" was started this year by the officers of the School Traffic Safety Staff. Children, five years of age, are prepared for the start of school with instruction about traffic lights, crosswalks, etc.

A concerted effort to remove abandoned and junk vehicles from the streets and private property of the City was initiated by Deputy Chief Marion Davey. This project was assigned to the Traffic Bureau, and two officers are detailed parttime to this project. Several hundred of these junked vehicles have been destroyed.

SCHOOL TRAFFIC SAFETY PROGRAM

"Safety Town"

During the year of 1972, a new dimension was added to the School Traffic Safety Program. The development and successful operation of a pilot program known as "Safety Town" was achieved. Working in cooperation with the Downtown Optimist Club, this needed block in our safety structure was initiated.

The Toledo Police School Traffic Safety Section is now in a position to handle a person from pre-school through driver education in high school; having contact with a person from the age of four through sixteen, the formative years of one's life.

"Safety Town" is a traffic safety course designed for pre-school children; held during the summer for children entering kindergarten or the first grade the following fall. It includes indoor instruction and outdoor practice on a miniature city plot, laid out with street and sidewalk markings, traffic lights, stop signs, etc.

The children are taught their left from their right, how to make signals and distinguish colors. Out of three hundred students, color blindness was detected in seven at this early age. They learn color by using crayons to color traffic lights cut from paper.

In the outdoor segment of "Safety Town" the class is divided into two groups. Half are assigned to tricycles and the other half serve as pedestrians. Then, under careful direction, simulating traffic conditions, the pedestrians are pitted against the driver. They are taught how to read traffic signs and to follow stop and go lights. If one of

the trike riders becomes a traffic offender, he then is demoted to being a pedestrian. This is a lesson in discipline. The course consists of two-hour sessions, five days a week, for a two-week period, with the program balanced between work and play. It is good to get them at this receptive age before they have developed bad habits.

Of course, there is a graduation day. This being the second Friday of the course. All appear in their best, and well-washed, extremely proud and happy.

Each graduate is presented a diploma signifying completion of the course. The children present a program of songs, etc., for the parents and friends. This being the child's first graduation, it is extremely inspiring and heartwarming.

Teaching the child about traffic hazards and to avoid them is the best protection he can have. "Safety Town" is a Pedestrian Program.

In the program we had three hundred representing sixty schools. A careful count will be kept on these for the first three school years. At the present time in the City of Toledo we have, in their age bracket, nineteen children injured by cars. None of the nineteen were children receiving "Safety Town" training.

It is our wish to carry this program into the summer of 1973 with a possible expansion to other locations in the city.

Awards to Safety Guards

During the month of September, 1972, an in-depth study was made as to how the School Safety Guard could receive some reward for

his or her services. The various and many meetings for a promotional gimmick resulted in a close working agreement with Sears Roebuck & Company and with W.C.W.A. Radio.

Starting on Monday, October 2, 1972, a school guard of the day was selected. He or she being recognized as such would have his or her name announced on W.C.W.A. Radio for that day. This ran from October 2, 1972, through June 1, 1973. Also, in recognition as Guard of the Day, the person so named will receive a "Certificate of Appreciation" from W.C.W.A. and a sweatshirt with the police decal on it is taken to the home of the guard by a member of the School Traffic Safety Program. This in itself is a projection of a positive image of the police officer in the community.

On Monday, April 2, 1973, each school safety patrol supervisor will be asked to submit the name of their outstanding guard. This guard will received \$5.00 in merchandise from Sears.

The outstanding guards will then submit an essay on a topic chosen by, judged by and winners selected by the School Traffic Safety Section. The winners of the essay will receive their awards May 14, 1973, at a luncheon for them and their parents.

First prize to be a \$500 savings bond, second prize to be a \$100 savings bond; third prize to be a \$50 savings bond and fourth prize to be a \$25 savings bond - ten to be given.

The response to this promotion has been so great that it is already finalized for the preceeding school year.

Chalk Talk

The "Chalk Talk" is an entirely new procedure for the Toledo Police School Traffic Safety Section.

By the use of drawing boards and colored pencils, the three very important words of STOP, LOOK and LISTEN are spelled out backward and upside down in a story form. It is with actual participation by the entire group that the three important words are formed.

This new approach has met with the greatest success in the entire school system, with teachers now asking us for help so they can use the system to further education in their classrooms.

Identification Cards

The "Identification Card" is now being circulated in the kindergarten and first grade rooms.

This card shows the Toledo Police Division decal on one side along with the safety rules and on the other side the crossed fingers, a city-wide recognition sign by policemen's helpers, along with the vital information, such as name, phone number, address, etc.

This card is the reward of each child that is able to learn the rules and to tell his or her teacher the necessary information needed to fill in the vital side.

Kindergarten teachers claim this to be the best incentive they have seen to help the little ones learn their names, address, safety rules, etc.

For further projection on this theme, we will be bringing into play an identification card for bicycle drivers.

On October 6, 1972, the Toledo Police School Traffic Safety Section moved its headquarters to a new location - One Stranahan Square. This move was deemed necessary to put us in a neutral location so that we are better able to serve all schools in the City of Toledo. This move removes the thoughts of many persons and school personnel that we were under the direct supervision of the Toledo Board of Education.

During the school year, the Traffic Safety Program was presented in one hundred seventeen schools.

Individual kindergarten visits were made, as well as individual classroom visits on the subject of the police officer in the community.

Our Safety Patrol Leadership Camp was held along with our in-service meetings with the Safety Patrol members. Many recognitions and installations of new guard members were attended.

On the high school level, the driver education classes in all nine high schools were visited as well as many business law classes.

In the evening activity, programs were presented for various service organizations, Kiwanis, Exchange Club, P.T.A., High 12, etc.

In all, the year of 1972, was very busy, and I must say, a very rewarding experience.

IDENTIFICATION CARD

THE BLADE GREEN BANNER SAFETY RULES

REMEMBER

1. Never walk or run from between parked cars.
2. Look both ways before you cross the street.
3. Walk, never run when you leave the curb.
4. Drive your bicycle safely and obey all signs and signals.
5. Play games in a safe place - away from the street.
6. Let's all help the Safety Patrol.

PROMOTIONS

Raymond C. Vetter	Assistant Chief
Patrick J. McNulty	Captain
Richard L. Kwiatkowski	Captain
Edward K. Bombrys	Lieutenant
William Burnside	Lieutenant
Harold D. Patterson	Lieutenant
James B. Moore	Lieutenant
David O. Roberts	Sergeant
Francis E. Nowak	Sergeant
Timothy L. Borkowski	Sergeant
James N. Schneider	Sergeant
James T. Bueter	Sergeant
William V. Kina	Sergeant
Henry C. Miller	Sergeant
Vincent P. DiPofi	Sergeant
Arnold Grimes	Captain
Richard McAtee	Lieutenant
Philip J. Moore	Lieutenant
Norbert Thiel	Lieutenant
James Greenwood	Sergeant
James Ritchie	Sergeant
Robert Krolak	Sergeant
Donald T. Hickey	Captain
Robert Lewandowski	Lieutenant
Robert L. Pitzen	Sergeant

RETIREMENTS

William G. Wiener	Deputy Chief
Roy C. Shelton	Captain
Clair W. Fauble	Lieutenant
Ernest Shea	Lieutenant
Charles T. DuShane	Sergeant
Chad Hennessy	Sergeant
Leo L. Wonderly	Patrolman
James Petersen	Patrolman
William P. Callanan	Lieutenant
William J. Gray	Captain
George Ryan	Patrolman
Ralph Gajewski	Patrolman

DEATHS - ACTIVE MEMBERS

William P. Strobel	Lieutenant
James P. Dempsey	Lieutenant
Merwin V. Dybala	Patrolman

DECEASED PENSIONERS

Richard I. Kraemer
Thomas C. Mackey
